
POSTMORTEM CHANGE IN HUMAN AND ANIMAL REMAINS

A Systematic Approach

MARC S. MICOZZI, M.D., Ph.D.

*Director
National Museum of Health and Medicine
Associate Director
Armed Forces Institute of Pathology
Washington, D.C.*

This book provides a unique, synthetic treatment of postmortem change presented in a systematic fashion with attention to the relative chronologies of both physical and cultural factors that influence human and animal remains. The author integrates reports and observations in the anthropology/archaeology literature with material as appropriate from medicine, pathology, neuropathology, ethnography and the forensic sciences as well as reporting on his own original observations. In addition to discussing transformations of skeletal remains, preservative treatment is given to changes in soft tissue remains and to conditions under which such remains may be recovered postmortem. This book fills in the blank where pathology has traditionally left off and where anthropology has traditionally begun with an integrated review of what anthropology traditionally considers. Now and more anthropologists and forensic scientists are called upon to systematically interpret postmortem changes "from beginning to end," covering across various fields of study. This is the first book to explore, explain and interpret all these aspects of postmortem change.
