Nature Of Sleep:

The Nature of Sleep Gordon Ethelbert Ward Wolstenholme, Maeve O'Connor, 1961 *The Physiologic Nature of Sleep*
Pier Luigi Parmeggiani, Ricardo A. Velluti, 2005 Provides a broad introduction to the subject of sleep An overview of some of

was one of the Athenian philosophers who took refuge in 531 AD with King Khosroes I of Persia after the Christian Emperor
Justinian stopped the teaching of the pagan Neoplatonist school in Athens This was one of the earliest examples of the sixth
century diffusion of the philosophy of the commentators to other cultures Tantalisingly Priscian fully recorded in Greek the
answers provided by the Athenian philosophers to the king's questions on philosophy and science But these answers survive
only in a later Latin translation which understood both the Greek and the subject matter very poorly Our translators have
often had to reconstruct from the Latin what the Greek would have been in order to recover the original sense The answers
start with subjects close to the Athenians hearts the human soul on which Priscian was an expert and sleep and visions But
their interest may have diminished when the king sought their expertise on matters of physical science the seasons celestial
zones medical effects of heat and cold the tides displacement of the four elements the effect of regions on living things why
only reptiles are poisonous and winds At any rate in 532 AD they moved on from the palace but still under Khosroes
protection This is the first translation of the record they left into English or any modern language This English translation is
accompanied by an introduction and comprehensive commentary notes which clarify and discuss the meaning and
implications of the original philosophy Part of the Ancient Commentators on Aristotle series the edition makes this
philosophical work accessible to a modern readership and includes additional scholarly apparatus such as a bibliography
