Names And Substance Of The Australian Subsection System:

Names and Substance in the Australian Subsection System Carl Georg Brandenstein, 1982-11 Structural analysis of subsection system as opposition between six basic physical or temperamental qualities constructs from this classification an Aboriginal World Order material drawn from many areas with an emphasis on north west Australia includes tribal index to contents *German Ethnography in Australia* Nicolas Peterson, Anna Kenny, 2017-09-21 The contribution of German ethnography to Australian anthropological scholarship on Aboriginal societies and cultures has been limited primarily because few people working in the field read German But it has also been neglected because its humanistic concerns with language religion and mythology contrasted with the mainstream British social anthropological tradition that prevailed in Australia until the late 1960s The advent of native title claims which require drawing on the earliest ethnography for any area together with an increase in research on rock art of the Kimberley region has stimulated interest in this German ethnography as have some recent book translations Even so several major bodies of ethnography such as the 13 volumes on the cultures of northeastern South Australia and the seven volumes on the Aranda of the Alice Springs region remain inaccessible along with many ethnographically rich articles and reports in mission archives In 18 chapters this book introduces and reviews the significance of this neglected work much of it by missionaries who first wrote on Australian Aboriginal cultures in the 1840s Almost all of these German speakers in particular the missionaries learnt an Aboriginal language in order to be able to document religious beliefs mythology and songs as a first step to conversion As a result they produced an enormously valuable body of work that will greatly enrich regional ethnographies *Social Anthropology and Australian Aboriginal Studies* Ronald Murray Berndt, Robert Tonkinson, 1988 Shifts of emphasis from 1961 1986 in the study of Aboriginal economy kinship gender issues religion law and social anthropology papers by C Anderson J A Barnes R M Berndt and R Tonkinson I Keen F Merlan H Morphy and N M Williams annotated separately **The Metamorphoses of Kinship** Maurice Godelier, 2012-03-03 With marriage in decline divorce on the rise the demise of the nuclear family and the increase in marriages and adoptions among same sex partners it is clear that the structures of kinship in the modern West are in a state of flux In *The Metamorphoses of Kinship* the world renowned anthropologist Maurice Godelier contextualizes these developments surveying the accumulated experience of humanity with regard to such phenomena as the organization of lines of descent sexuality and sexual prohibitions In parallel Godelier studies the evolution of Western conjugal and familial traditions from their roots in the nineteenth century to the present The conclusion he draws is that it is never the case that a man and a woman are sufficient on their own to raise a child and nowhere are relations of kinship or the family the keystone of society Godelier argues that the changes of the last thirty years do not herald the disappearance or death agony of kinship but rather its remarkable metamorphosis one that ironically is bringing us closer to the traditional societies studied by ethnologists *A Handbook of Aboriginal Languages of New South Wales and the Australian Capital Territory* James

William Wafer, Amanda Lissarrague, 2008 The handbook is a guide to Aboriginal languages with illustrative vocabularies It is divided into two parts the first part which includes maps is a survey of the Indigenous languages of NSW and the ACT giving information about dialects locations and resources available for language revitalisation the second part provides word lists in practical spelling for 42 distinct language varieties There is also useful information on contact languages sign languages and kinship classification as well as an appendix on placenames The handbook is a valuable reference and educational resource useful to Aboriginal people who want to revitalise their language Handbook of Western Australian Aboriginal Languages South of the Kimberley Region Nick Thieberger, 1993 Gives location variant spelling classification linguistic situation research and bibliographic information for all languages in regions south of Kimberleys notes on Aboriginal English and Kriol extensive annotated bibliography indexes to variant language spellings and to linguists Encountering Aboriginal Languages William McGregor, 2008 This edited volume represents the first book length study of the history of research on Australian Aboriginal languages and collects together 18 original papers on a wide variety of topics spanning the period from first settlement to the present day The introduction sets the scene for the book by presenting an overview of the history of histories of research on the languages of Australia and identifying some of the major issues in Aboriginal linguistic historiography as well as directions for future investigations Part 1 presents three detailed investigations of the history of work on particular languages and regions The eight papers of Part 2 study and re evaluate the contributions of particular individuals most of who are somewhat marginal or have been marginalised in Aboriginal linguistics Part 3 consists of six studies specific linguistic topics sign language research language revival pidgins and creoles fieldwork Fr Schmidt s work on personal pronouns and the discovery that Australia was a multilingual continent Overall the volume presents two major challenges to Australianist orthodoxy First the papers challenge the typically anachronistic approaches to the history of Aboriginal linguistics and reveal the need to examine previous research in the context of their times and the advantages of doing so to contemporary understanding and language documentation Second the widespread presumption that the period 1910 1960 represented the dark ages of Aboriginal linguistics characterised by virtually no linguistic work is refuted by a number of studies in the present volume **Going the Whiteman's Way** David McKnight, 2004 Modern anthropologists unlike their classical predecessors have observed Australian Aborigines in the field rather than from the study None however has spent as long as David McKnight in a single community During a period of 35 years involving some 20 fieldtrips he has lived with the Mornington Islanders of northern Queensland for over five years This intellectual tour de force combines dense ethnography about Australian kinship and marriage the heart of their world with major anthropological debate about theories of kinship It thereby provides a unique and important contribution to kinship studies McKnight shows how young Aborigines became increasingly determined to marry according to their own inclinations defying the authority of the elders who accused them of going the Whiteman s Way *The World Archaeological Congress, 1-7 September 1986, Southampton and London:*

Cultural attitudes to animals including birds, fish and invertebrates (3 v.), 1986 Further Applications of Linguistics to Australian Aboriginal Contexts Graham R. McKay, B. A.
