Sternberg, Cynthia A. Berg, 1992-03-27 Books on intellectual development typically separate development into distinct developmental periods the formation of intelligence and basic cognitive skills that occurs until adolescence and the maintenance decline or improvement of these intellectual skills across the adult life span Robert Sternberg and Cynthia Berg have integrated research on these two development periods by bringing together authors that provide a comprehensive overview to the major approaches to intellectual development The authors draw on six different approaches to intellectual development through childhood or adulthood psychometric Piagetian new Piagetian information processing learning and the contextual perspectives Common themes arise within and across particular perspectives which suggests that a more unified view of intellectual development may emerge as boundary lines between perspectives and developmental periods diminish

Cognitive Development Sergio Morra, Camilla Gobbo, Zopito Marini, Ronald Sheese, 2012-12-06 Tying together almost four decades of neo Piagetian research Cognitive Development provides a unique critical analysis and a comparison of concepts across neo Piagetian theories Like Piaget neo Piagetian theorists take a constructivist approach to cognitive development are broad in scope and assume that cognitive development is divided into stages with qualitative differences Unlike Piaget however they define the increasing complexity of the stages in accordance with the child s information processing system rather than in terms of logical properties This

volume illustrates these characteristics and evidences the exciting possibilities for neo Piagetian research to build connections both with other theoretical approaches such as dynamic systems and with other fields such as brain science The opening chapter provides a historical orientation including a critical distinction between the logical and the dialectical Piaget In subsequent chapters the major theories and experimental findings are reviewed including Pascual Leone s Theory of Constructive Operators Halford s structuralist theory Fischer s dynamic systems approach to skills Case s theory of Central Conceptual Structures Siegler s microgenetic approach and the proposals of Mounoud and Karmiloff Smith as well as the work of others including Demetriou and de Ribaupierre The interrelation of emotional and cognitive development is discussed extensively as is relevant non neo Piagetian research on information processing The application of neo Piagetian research to a variety of topics including children s problem solving psychometrics and education is highlighted The book concludes with the authors views on possibilities for an integrated neo Piagetian approach to cognitive development
