**Words Derived from Old Norse in Early Middle English** Richard Dance, 2003 The influence exerted upon English vocabulary by words that derive from the Scandinavian languages is widespread and profound These words entered English by Norse speakers in the Anglo Saxon period and they claim amongst their number some of the most frequent and important items of everyday modern usage There nevertheless remains a great deal about this element that we do not properly understand This book presents etymological and contextual studies of the lexical terms originally derived from Old Norse that are found in the principal early Middle English texts from the South West Midlands This is a region that contains some of the most celebrated literary works of the period when Norse derived words first appear in significant numbers in written English the late twelfth to the later thirteenth century being outside the area of the Danelaw it also presents crucial opportunities for us to understand the transmission of Norse derived vocabulary to parts of England beyond those of the heaviest initial Scandinavian settlement This book will be of interest to scholars of early English lexicology semantics and dialectology to those studying the background to and linguistic resources of early Middle English literature and to all those fascinated by the Scandinavian contribution to the history of the English language

*Studies in Middle English Forms and Meanings* Gabriella Mazzon, 2007 The Volume contains written versions of some contributions to the Fifth International Conference on Middle English ICOME 5 held at the University of Naples in 2005 Most of the papers concentrate on individual aspects of grammar and semantics although some focus on dialectal fragmentation and others adopt a pragmatic perspective There is still a lot to be done in the study of the Middle English lexicon in the same way as there are many aspects of grammar that have not been fully studied yet The volume aims at providing contributions that can further the knowledge of these subfields of English historical linguistics through state of the art case studies that also exploit all modern resources such as computerised corpora and electronically tagged texts
