Monuments for Posterity Antony Kalashnikov, 2023-04-15 *Monuments for Posterity* challenges the common assumption that Stalinist monuments were constructed with an immediate propagandistic function arguing instead that they were designed to memorialize the present for an imagined posterity In this respect even while pursuing its monument building program with a singular ruthlessness and on an unprecedented scale the Stalinist regime was broadly in step with transnational monument building trends of the era and their undergirding cultural dynamics By integrating approaches from cultural history art criticism and memory studies along with previously unexplored archival material Antony Kalashnikov examines the origin and implementation of the Stalinist monument building program from the perspective of its goal to immortalize the memory of the era He analyzes how this objective affected the design and composition of Stalinist monuments what cultural factors prompted the sudden and powerful yearning to be remembered and most importantly what the culture of self commemoration revealed about changing outlooks on the future both in the Soviet Union and beyond its borders *Monuments for Posterity* shifts the perspective from monuments political ideological content to the desire to be remembered and prompts a much needed reconsideration of the supposed uniqueness of both Stalinist aesthetics and the temporal culture that they expressed Many Stalinist monuments still stand prominently in postsocialist cityscapes and remain the subject of continual heated political controversy Kalashnikov makes manifest monuments intentional attempts to seduce us the posterity for whom they were built

A Place to Remember Bruce Scates, 2009-11-04 This book charts the Shrine's history from the first fatalities of the Gallipoli landing to the present day

The Memorial to the Missing of the Somme Gavin Stamp, 2010-08-06 Edwin Lutyens Memorial to the Missing of the Somme at Thiepval in Northern France visited annually by tens of thousands of tourists is arguably the finest structure erected by any British architect in the twentieth century It is the principal tangible expression of the defining event in Britain's experience and memory of the Great War the first day of the Battle of the Somme on 1 July 1916 and it bears the names of 73 000 soldiers whose bodies were never found at the end of that bloody and futile

campaign This brilliant study by an acclaimed architectural historian tells the origin of the memorial in the context of commemorating the war dead it considers the giant classical brick arch in architectural terms and also explores its wider historical significance and its resonances today So much of the meaning of the twentieth century is concentrated here the Thiepval Memorial to the Missing casts a shadow into the future a shadow which extends beyond the dead of the Holocaust to the Gulag to the disappeared of South America and of Tianenmen Reissued in a beautiful and striking new edition for the centenary of the Somme
