Arguments about ethics often centre on traditional questions of for instance euthanasia and abortion Whilst these questions are still in the foreground recent years have seen an explosion of new moral problems Moral and political clashes are now as likely to be about sexuality and gender and the status of refugees immigrants and borders or the ethics of social media safe spaces disability and robo ethics How should we approach these debates What are the issues at stake What are the most persuasive arguments Edited by best selling philosophy author David Edmonds *Ethics and the Contemporary World* assembles a star studded line up of philosophers to explore twenty five of the most important ethical problems confronting us today They engage with moral problems in race and gender the environment war and international relations global poverty ethics and social media democracy rights and moral status and science and technology Whether you want to learn more about the ethics of poverty food extremism or artificial intelligence and enhancement this book will help you understand the issues sharpen your perspective and hopefully make up your own mind *Contemporary Moral Problems* James E. Howe, John Gyun Yeol Park, 2025-08-28 Education is a human right but it also serves a practical function of improving the performance of domestic and international governance Those who govern have an obligation to provide conditions of peace and security to reconcile conflicts of interest and to generate collective good all while abiding by the rule of law Those who are governed likewise have obligations firstly towards their fellow citizens but also to conceptualizations of the wider body politic to the collective good and towards those who govern in the interests of society through resolving collective action problems Education is key to training those who would govern but also to training citizens to recognize when the instruments of government both actors and institutions fail to adhere to the principles of good governance Furthermore education provides the foundation for concepts of good citizenship among civil society The chapters in this edited collection reflect upon the myriad ways in which supporting education and capacity building training programs can not only bring benefit to the recipients but also to the wider communities to which they belong These include building resilience through empowering civil society promoting democratic governance through civic education building peace within and between societies using education and training as tools of development the public diplomacy role of educational scholarships and the internationalization of learning environments The transformative nature of principled education can have a remarkable impact when applied to policy platforms within the state and beyond its borders This is a rare insight into the purpose and

value of education in the Republic of Korea and will be a useful addition to any collection supporting studies in education and Asian Studies It is supported by the Korean Association for Public Value **Ethics and Society** University of Kansas,1968

Pritchard,1991 Pritchard provides a deliberate and convincing argument for a starting point for the discussion of moral development on in which self regard and empathy provide equally essential groundings for individual morality Drawing essential elements from the work of Reid Strawson Rawls Kohlberg and Gilligan he builds a comprehensive framework for tracing moral development from childhood one that allows human morality to be grounded in both reason and emotion and that recognizes the importance to morality of justice and rights as well as caring and responsibility Religion and the Modern World John Herman Randall,John Herman Randall (Jr.),1929 **Journal of Religious Psychology, Including Its Anthropological and Sociological Aspects** ,1908 Includes section Book reviews Contemporary French Novelists René Doumic,1899 *Moral Issues in Military Decision Making* Anthony E. Hartle,2004 Much has changed in warfare in recent years with America now dominant on the international scene and terrorism the new enemy In light of these changes the need for moral grounding in military actions is a more pressing concern than ever When it was originally published *Moral Issues in Military Decision Making* reflected the concerns posed by nuclear stalemate and the lessons of Vietnam In that highly praised work Anthony Hartle outlined the essential elements of the Professional Military Ethic created for American military forces In this new edition he reexamines the moral foundations for America s military leadership in the post 9 11 era Considering world affairs since the first edition the Gulf War Bosnia Afghanistan Iraq 9 11 and the emergence of the United States as an unrivaled military power Hartle

explains how these events have raised ethical issues that differ dramatically from those of the Cold War by the war on terrorism homeland defense asymmetric warfare the proliferation of American military interventions and the UN's role in peacekeeping operations Using meticulously analyzed case studies twice as many as in the first edition he considers such moral dilemmas as torture challenging superior officers use of overwhelming force and responding to fire in the presence of civilian shields In this revision Hartle examines further the status of professional military ethics in light of current affairs changes in the articulation of military values and recent research In a new chapter on human rights he relates moral principles directly to values embedded in the Constitution and argues that overwhelming American military power cannot succeed unless it is accompanied by the moral force of the values it seeks to protect difficulties of applying conventional laws of war and human rights doctrine in military operations Hartle convincingly shows that national security is as much about the preservation of moral principles as it is about the protection of America's citizens and borders His book demonstrates that the American military must continue to observe those principles in order to be effective in its primary mission
