Morality And Imagination Paradoxes Of Progress:

Morality and Imagination Yi-fu Tuan,1989 Can the individual and society be both moral and imaginative In Western society the moral person tends to be regarded as either simple and naive or narrow and bigoted In contrast the imaginative person is looked on as someone not bound by the customs of the group and therefore likely to be fanciful and out of touch with reality

Morality's Progress Dale Jamieson,2002 Morality s Progress is the summation of nearly three decades of work by Dale Jamieson a leading figure in environmental ethics and bioethics The twenty two papers here are invigoratingly diverse but together tell a unified story about various aspects of the morality of our relationships to animals and to nature The volume begins by addressing the possibility of moral progress and the value of practical ethics It then moves on to discuss the nature of animal minds and our moral duties with respect to animals it concludes with essays that address larger environmental questions Considered as a whole *Morality s Progress* is an attempt to draw out the moral consequences of a thoroughgoing Darwinian Naturalism The perspective that informs this work is philosophically naturalist morally consequentialist and metaethically constructivist Jamieson s essays will convince sceptics that thinking about our moral relations to animals and nature can offer great intellectual reward and his work here sets a challenging controversial agenda for the future

Morality and Imagination Yi-fu Tuan,1989 **Progress** Robert David Sack,2003-04-01 The connection between geography and progress is fundamental writes Robert Sack in the introduction to the present volume Touching on both moral and material progress six of the world s leading geographers and environmental historians explore differing aspects of this connection Thomas Vale discusses whether progress is discernible in the natural realm Kenneth Olwig examines fundamental changes that occurred to the notion of progress with the rise of modernity while David Lowenthal and Yi Fu Tuan discuss recent geographical changes that have resulted in an increasing societal disenchantment and anxiety Nicholas Entrikin looks at progress as moral perfectibility and its connection to democratic places a theme which Robert Sack further explores by prescribing ways in which geographers and citizens can evaluate and create places that increase our awareness of reality in its variety and complexity Contributors J Nicholas Entrikin University of California Los Angeles David Lowenthal University College London Kenneth Olwig University in Trondheim Norway Robert David Sack University of Wisconsin Madison Yi Fu Tuan University of Wisconsin Madison Thomas R Vale University of Wisconsin Madison

Geography and Ethics James D. Proctor,David M. Smith,2002-09-11 This book represents a landmark exploration of the common terrain of geography and ethics Drawing together specially commissioned contributions from distinguished geographers across the UK North America and Australasia the place of geography in ethics and of ethics in geography is examined through wide ranging thematic chapters Geography and Ethics is divided into four sections for discussion and exploration of ideas Ethics and Space Ethics and Place Ethics and Nature and Ethics and knowledge all of which point to the rich interplay between geography and moral philosophy or ethics

Geographic Thought George Henderson,Marvin

Waterstone,2008-08-28 This unabridged reader offers a fresh approach to learning about Geographic Thought by showing through concrete examples and detailed editorial essays how the discipline has been forever altered by the rise of progressive social struggles of the last 30 years Envisioning Human Geographies Paul Cloke,Philip Crang,Mark Goodwin,2014-02-24 Bringing together many of the leading human geographers from around the English speaking world Envisioning Human Geographies offers a series of personal visions for the future of human geography The result is a vigorous and far sighted debate about what human geography could and should be concerned with in the twenty first century The individual contributors develop their arguments to address the shape and direction of human geographies with each chapter looking forward and envisioning an intellectual future for the subject The result is a set of powerful statements written around the themes of space nature enclosure political economy non representation post colonialism feminism post structuralism computation morality spirituality activism The statements are tied via an introduction that discusses the ideological academic and aesthetic prompts that fire the human geographical imagination Envisioning Human Geographies maps out important new territories of enquiry for human geography and is essential reading for all students studying the nature and philosophy of the subject Moral Geographies David Marshall Smith,2000 This book explores the interface between geography ethics and morality It considers questions that have haunted the past are subjects of controversy in the present and which affect the future Does distance diminish responsibility Should we interfere with the lives of those we do not know Is there a distinction between private and public space Which values and morals if any are absolute and which cultural communal or personal And are universal rights consistent with respect for difference David Smith shows how these questions play themselves out in politics planning development social and personal relations the exploitation of resources and competition for territory After introducing the essential elements of moral philosophy from Plato to postmodernism he examines the moral significance of concepts of landscape location and place proximity distance and community space and territory justice and nature He is concerned above all with the morality people practice to see how this varies according to geographical context and to assess the inevitability of its outcomes His argument is seamlessly interwoven with everyday observation and vividly described case studies the latter include genocide and rescue during the Holocaust the conflicts over space between Israel and Palestine and within Israel itself and the social tensions and aspirations in post apartheid South Africa The meaning possibility and limits of social justice lie at the heart of the book That geographical context is vital to the understanding of moral practice and ethical theory is its central proposition The book is clearly and engagingly written The author has a student readership in mind but his book will appeal widely to geographers and others involved in planning development politics social theory and the analysis of the contemporary world **Géographe Canadien** ,1989 The New York Times Book Review ,1989-04 Presents extended reviews of noteworthy books short reviews essays and articles on topics and trends in publishing literature culture and the arts Includes lists of best sellers hardcover and paperback Whitaker's

Book List ,1989 *Nature's Revenge* Josée Johnston,Michael Anthony Gismondi,James Goodman,2006-02 An indispensable and timely collection which confronts the core questions at the multi scale intersections of political ecology and political economy today Roger Keil York University *Place, Modernity, and the Consumer's World* Robert David Sack,1992 To create successful consumer places a retail store may be designed to look like the Australian outback A museum may have the appearance of a department store Travel tours may wend through native communities that stage traditional behavior Umberto Eco calls this authentication or instances where the American imagination demands the real thing and to attain it must fabricate the absolute fake In *Place Modernity and the Consumer s World* geographer Robert Sack explores this phenomenon along with other problems of modernity mass consumption and advertising to present a dynamic picture of how space and place define the world of the consumer He begins with the geographical premise that space and place provide a means by which we make sense of the world and through which we act He expands this premise to form a relational framework for geographical analysis which is used to show how space is embedded in the realms of meaning nature and social relations He proceeds to demonstrate how places are defined by the ways in which they bring together and transform these three realms Sack then turns to the consumer s world the shopping malls department stores theme parks and resorts that form the everyday landscape of mass consumption He looks at how these places together with the advertising that idealizes the way products are supposed to create places and contexts are constructed and how they intentionally alter aspects of reality in such a way as to create those disorienting qualities associated with postmodernism Finally Sack considers place as both an empirical and a moral concept and establishes a geographical basis for making moral judgments about it Using that framework he finds that places of consumption impair judgment because they disguise the relationships between meaning nature and social relations *Geothics* William Stephen Lynn,2000 Cast Into the Deep Jimmy A. Belita,1994 *Marshall McLuhan: Renaissance for a wired world* Gary Genosko,2004 ICSSR Journal of Abstracts and Reviews Indian Council of Social Science Research,1992 Environment and Planning ,2002 International interdisciplinary journal discussing the relations between Society and Space Space is broadly conceived from landscapes of the body to global geographies from cyberspace to old growth forests as metaphorical and material as theoretical construct and empirical fact Covers both practical politics and the abstractions of social theory Choice ,1990 *The Social Transcript* Charles B. Osburn,2009 Many glimpses into what might be called library philosophy are scattered throughout the literatures of library history and library and information science but none has coalesced as yet Conversely theories relative to the operation of libraries rather than relative to why their operations are necessary in the first place are exceedingly abundant At the heart of both resides function On the one hand the concept of a library reflects a rational social process its genesis and survival the result of each succeeding generation embracing the same core values as the one before At the same time practice in the library is bounded by both the experiences and expectations of the public and our choice and treatment of topic in our

scholarly and professional literature Not surprisingly fundamental misunderstandings are shared among public scholar and librarian about what the library is and why it exists Adapting the work of Kenneth Boulding Charles Osburn presents a cogent well substantiated explanation of why the library refuses to cede its position as a cultural icon and how it not only continues but flourishes throughout the trials and errors of civilization Back cover
