## **Morality In Context:**

**Morality in Context** advances in Psychology (Aip 139) Wolfgang Edelstein, Gertrud Nunner-Winkler, 2005-03 Morality in context is a timely topic A debate between philosophers and social scientists is a good way to approach it Why is there such a booming interest in morality and why does it focus on context One starting point is the change in the sociostructural and sociocultural conditions of modern societies This involves change in the empirical conditions of moral action and in the social demand on morality As these changes are accounted for and analyzed in the social sciences new perspectives emerge that give rise to new ways of framing issues and problems These problems are best addressed by way of cooperation between philosophers and social scientists As Habermas 1990 has pointed out in a much cited paper philosophers depend on social science to fill in the data they require to answer the questions raised by philosophy in its placeholder function The reverse also holds true Social science needs the conceptual clarifications that philosophy can provide With respect to morality such mutual interchanges are of particular importance the contributions to this book show convincingly

**The Culture of Morality** Elliot Turiel, 2002-04-08 A thought provoking examination of how explanations of social and moral development inform our understandings of morality and culture A common theme in the latter part of the twentieth century has been to lament the moral state of American society and the decline of morality among youth A sharp turn toward an extreme form of individualism and a lack of concern for community involvement and civic participation are often blamed for the moral crisis Turiel challenges these views drawing on a large body of research from developmental psychology anthropology sociology as well as social events political movements and journalistic accounts of social and political struggles Turiel shows that generation after generation has lamented the decline of society and blamed young people Using historical accounts he persuasively argues that such characterizations of moral decline entail stereotyping nostalgia for times past and a failure to recognize the moral viewpoint of those who challenge traditions

*Ethics in Context* Gernot Böhme, 2018-03-14 In this clear and accessible book Gernot Böhme places philosophical ethics in the context of our individual and social lives Arguing against the conception of ethics as a body of knowledge Böhme defines morality as a matter of serious questions In the case of an individual a serious question is one that determines that person's mode of living In the case of society a serious question is one that shapes our social norms In *Ethics in Context* Böhme explores the key areas of moral living and moral discourse He examines some of the urgent issues affecting society today such as the moral implications of reproductive technology man's mastery over nature and the right of citizenship This book is a lucid and engaging guide to ethics which will be of great interest to students of philosophy and indeed to all those interested in the subject

*Morality in the Making* Helen Weinreich-Haste, Don Locke, 1983

**Morality Without Foundations** Mark Timmons, 1999 *Morality Without Foundations* investigates fundamental metaethical questions about the meaning truth and justification of moral thought and discourse Mark Timmons maintains that all versions of descriptivism in ethics particularly certain accounts of moral realism fail He

argues instead that a correct metaethical theory should embrace some version of non descriptivism Timmons defends what he calls assertoric non descriptivism which unlike traditional non descriptivist views holds that moral sentences are typically used to make genuine assertions In defending this view he exploits contextual semantics providing him with the semantic flexibility to develop an irrealist account of moral discourse Timmons goes on to support a contextualist moral epistemology completing his overall version of contextualism in ethics Like his foundationalist rivals Timmons recognizes that there are moral beliefs that are epistemically basic in providing a basis for the justification of non basic moral beliefs Yet he agrees with the coherentist in maintaining that there are no intrinsically justified beliefs that can serve as a single foundation for a system of moral knowledge Timmons ultimately finds that regresses of justification of moral belief end with contextually basic beliefs moral beliefs which in the relevant context are responsibly held but in other contexts might not be suitable as regress stoppers Timmons novel defense of morality without foundations offers provocative reading for philosophers working in the areas of ethics epistemology and metaphysics Yet written with the student in mind his lucid presentation of difficult ideas makes this book accessible to students and newcomers to the field of metaethics

Radical Critiques of the Law Stephen M. Griffin,Robert C. L. Moffat,1997 The past two decades have seen an outpouring of work in legal theory that is self consciously critical of aspects of American law and the institutions of the liberal state In this lively volume eminent scholars in philosophy law and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law examining such theories as critical legal studies feminist theory and theories of difference and critical race theory The authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of American law should take Writing at the cutting edge of the critique of critical legal theory they offer insights first on critical legal scholarship then on feminist political and legal theory A third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism while a final section focuses on current issues of legal reform through critical views on criminal punishment including observations on rape and hate speech Each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it while accompanying commentaries present conflicting views The resulting dialogue explores wide ranging issues like equity value relativism adversarial and empathic legal advocacy communitarianism and the social contract impartiality and contingency natural law and corrective justice A common thread for many of the articles is a focus on the social dimension of society and law which finds the individualism of prevailing liberal theories too limiting Radical Critiques of the Law is particularly unique in presenting critical and feminist approaches in one volume along with skeptical commentary about just how radical some critiques really are Proposing

alternative critiques that embody considerably greater promise of being truly radical it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best *Fundamentals of Ethics* Wilbur Marshall Urban,1930 **Catholic Moral Teaching and Its Antagonists** Joseph Mausbach,1914 **The Morality of Punishment with Some Suggestions for a General Theory of Ethics** Alfred Cyril Ewing,1929 Citizenship and Democratic Doubt Bob Pepperman Taylor,2004 Much of the world today views America as an imperialist nation bent on global military economic and cultural domination At home few share this negative view Bob Pepperman Taylor however argues that US moral self righteousness may potentially imperil democratic ideals and threaten democracy
