## **More Process Patterns Delivering Large Scale Systems Using Object Technology:**

Distributed Object Architectures with CORBA Henry Balen,2000-02-13 Distributed Object Architectures with CORBA is a guide to designing software comprised of distributed components While it is based on OMG s Common Object Request Broker Architecture CORBA standard the principles also apply to architecture built with other technology such as Microsoft s DCOM As ORB products evolve to incorporate new additions to CORBA the knowledge and experience required to build stable and scalable systems is not widespread With this volume the reader can develop the skills and knowledge that are necessary for building such systems The book assumes a familiarity with object oriented concepts and the basics of CORBA Software developers who are new to building systems with CORBA based technologies will find this a useful guide to effective development

**Situational Method Engineering: Fundamentals and Experiences** Jolita Ralyté,Sjaak Brinkkemper,Brian Henderson-Sellers,2007-09-10 Over the last decade Method Engineering defined as the engineering discipline to design construct and adapt methods including supportive tools has emerged as the research and application area for using methods for systems development This book contains the papers from the IFIP Working Group 8.1 conference on Situational Method Engineering

Model Driven Engineering Languages and Systems Lionel Briand,2005-09-19 This book constitutes the refereed proceedings of the 8th International Conference on Model Driven Engineering Languages and Systems formerly the UML series of conferences MoDELS 2005 held in Montego Bay Jamaica in October 2005 The 52 revised full papers and 2 keynote abstracts presented were carefully reviewed and selected from an initial submission of 215 abstracts and 166 papers The papers are organized in topical sections on process modelling product families and reuse state behavioral modeling aspects design strategies model transformations model refactoring quality control MDA automation UML 2.0 industrial experience crosscutting concerns modeling strategies as well as a recapitulatory section on workshops tutorials and panels

**New Trends in Software Methodologies, Tools and Techniques** Hamido Fujita,Roberto Revetria,2012 Software is the essential enabling means for science and the new economy It helps us to create a more reliable flexible and robust society But software often falls short of our expectations Current methodologies tools and techniques remain expensive and are not yet sufficiently reliable while many promising approaches have proved to be no more than case by case oriented methods This book contains extensively reviewed papers from the eleventh International Conference on New Trends in software Methodology Tools and Techniques SoMeT\_12 held in Genoa Italy in September 2012 The conference provides an opportunity for scholars from the international research community to discuss and share research experiences of new software methodologies and techniques and the contributions presented here address issues ranging from research practices and techniques and methodologies to proposing and reporting solutions for global world business The emphasis has been on human centric software methodologies end user development techniques and emotional reasoning for an optimally harmonized performance between the design tool and the user Topics covered include the handling of

cognitive issues in software development to adapt it to the user's mental state and intelligent software design in software utilizing new aspects on conceptual ontology and semantics reflected on knowledge base system models This book provides an opportunity for the software science community to show where we are today and where the future may take us
