Forbidden Fruit Richard Ned Lebow, 2010 Could World War I have been averted if Franz Ferdinand and his wife hadn t been murdered by Serbian nationalists in 1914 What if Ronald Reagan had been killed by Hinckley s bullet Would the Cold War have ended as it did In Forbidden Fruit Richard Ned Lebow develops protocols for conducting robust counterfactual thought experiments and uses them to probe the causes and contingency of transformative international developments like World War I and the end of the Cold War He uses experiments surveys and a short story to explore why policymakers historians and international relations scholars are so resistant to the contingency

and indeterminism inherent in open ended nonlinear systems Most controversially Lebow argues that the difference between counterfactual and so called factual arguments is misleading as both can be evidence rich and logically persuasive A must read for social scientists Forbidden Fruit also examines the binary between fact and fiction and the use of counterfactuals in fictional works like Philip Roth s The Plot Against America to understand complex causation and its implications for who we are and what we think makes the social world work
