Race And Redistricting:

Race and Redistricting Tinsley E. Yarbrough, 2002 Through much of the 1990s a newly hatched snake wreaked political havoc in the South When North Carolina gained a seat in Congress following the 1990 census it sought to rectify a long standing failure to represent African American voters by creating under federal pressure two majority minority voting districts One of these snaked along Interstate 85 for nearly two hundred miles not much wider than the road itself in some places and was ridiculed by many as one of the least compact legislative districts ever proposed From 1993 to 2001 three intertwined cases went before the Supreme Court that decided how far a state could go in establishing voting districts along racial lines Noted Supreme Court biographer Tinsley Yarbrough examines these closely linked landmark cases to show how the Court addressed the constitutionality of redistricting within the volatile contexts of civil rights and partisan politics A suit was first filed by Duke University law professor Robinson Everett a liberal who loathed discrimination but considered racially motivated redistricting a clear violation of the Fourteenth Amendment s equal protection clause Yarbrough tells how Everett enlisted associates as plaintiffs and went on to win two Supreme Court victories in *Shaw v Reno* 1993 and *Shaw v Hunt* 1996 both by 5 4 decisions Following the creation of another flawed redistricting plan he rounded up a new set of plaintiffs to take the battle back to the Supreme Court But this time in *Easley v Cromartie* on the swing vote of Justice Sandra Day O Connor the 5 4 vote went against him Yarbrough shows the significant impact these cases have had on election law and the fascinating interplay of law politics and human conflict that the dispute generated Drawing heavily on court records and on interviews with attorneys on both sides of the litigation he relates a complex and intriguing tale about these protracted struggles His cogent and balanced analysis considers whether the state legislature was wrong in using race as a measure for establishing the new district or whether it was simply engaging in the time honored practice of gerrymandering to ensure political balance *Race and Redistricting* spotlights efforts to racially engineer voting districts in an effort to achieve fair representation By examining one state s efforts to confront such dilemmas it helps readers better understand future disputes over race and politics as well as the ongoing debates over our color blind constitution

Race and Redistricting in the 1990s Bernard Grofman, 1998 A portrait of how the 1990s round of redistricting treated the racial and linguistic minorities that had been given special protections by the Voting Rights Act of 1965 primarily African Americans but also Native Americans Asian Americans and those of Spanish heritage Throughout the volume the primary focus is on the practical politics of redistricting and its consequences for racial representation Almost all the authors have been directly involved in the 1990s redistricting process either as a legislator a member of the Voting Rights Section of the Justice Department a member of a districting commission or most commonly as an expert witness or lawyer in voting rights cases All bring to bear special insights as well as insider knowledge of Congressional and state redistricting

African Americans and the Politics of Congressional Redistricting Dewey M. Clayton, 2004-11-23 This book provides a detailed analysis of the

politics of racial redistricting a topic of particular concern in light of recent federal court cases The book is divided into two parts Part one examines the historical exclusion of blacks from the American political process and the politics behind congressional redistricting The text focuses on partisan manoeuvring and assesses whose interests were being served In particular the book chronicles the legislative action creation of majority black districts in North Carolina and around the South Part two shifts the focus to the myriad of legal battles that ensued as a result of the newly created districts in North Carolina and around the South Majority black districts have been dismantled in the Supreme Court This has been due to the criticism of their arbitrary shape and the notion that race was considered a predominant fact or in their design Yet irregularly shaped majority white districts have not been accused of violating districting principles This book purports that blacks were not elected to national office in large numbers prior to the creation of majority black districts indicating the continuing need for race conscious districting as a temporary solution to a complex problem

Race, Redistricting, and Representation David T. Canon, 1999-10 Since the creation of minority dominated congressional districts eight years ago the Supreme Court has condemned the move as akin to political apartheid while many African American leaders argue that such districts are required for authentic representation In the most comprehensive treatment of the subject to date David Canon shows that the unintended consequences of black majority districts actually contradict the common wisdom that whites will not be adequately represented in these areas Not only do black candidates need white votes to win but this crucial swing vote often decides the race And once elected even the black members who appeal primarily to black voters usually do a better job than white members of walking the racial tightrope balancing the needs of their diverse constituents Ultimately Canon contends minority districting is good for the country as a whole These districts not only give African Americans a greater voice in the political process they promote a politics of commonality a biracial politics rather than a politics of difference

The Paradox of Representation David Lublin, 1997 Political scientist David Lublin offers an unprecedented analysis of a vast range of rigorous empirical evidence that exposes the central paradox of racial representaton Lublin s evidence together with policy recommendations for improving minority representation will make observers of the political scene reconsider the avenues to fair representation

Maximization, Whatever the Cost Maurice T. Cunningham, 2000-10-30 During the early 1990s the Department of Justice used its Voting Rights Act power to object to racially unfair redistricting laws to force states to maximize minority congressional districts The results were dramatic Congressional Black Caucus membership swelled from 25 to 38 and nine new Hispanic congresspersons were sworn in Only three years later the maximization strategy lay in ruins The courts forced many of the new minority districts to be redrawn and the judiciary reserved especially harsh criticism for the Department Cunningham examines and analyzes how the Department came to adopt the maximization strategy He explores the bureaucratic culture of the Division's Voting Section its history and the interaction of its progressive career staff with more conservative political appointees The Division works amidst a vibrant interest group environment with civil rights advocates the state and political parties eager for influence Cunningham shows how that influence contest was won by the civil rights groups how their preferred interpretations of fair redistricting and discriminatory purpose were adopted by the Division and how their chosen districting models were forced upon states by the Division He examines the effect the Department has had on federalism representation and its own impaired credibility with the judiciary Finally he suggests how the Division might resurrect its damaged reputation for balanced enforcement An important study for scholars students and public policy makers involved with civil rights public administration and public law

Classifying by Race Paul E. Peterson, 2014-07-14 The contemporary debate over racial classification has been dominated by fringe voices in American society Cries from the right say history should be abrogated and public policy made color blind while zealots of the left insist that all customs language institutions and practices are racially tinged and that only aggressive color conscious programs can reverse the course of American history The essays in this volume however recognize that racial classification is an issue that cuts too deep and poses too many constitutional questions to be resolved by slogans of either the right or the left The contributors to this volume are James Alt Kenneth Benoit Henry Brady John Bruce Rodolfo O de la Garza Andrew Gelman Lani Guinier Fredrick C Harris Gary King Robert C Lieberman David Ian Lublin David Metz Paul E Peterson Kay Lehman Schlozman Kenneth Shepsle Theda Skocpol Katherine Tate Richard Valelly Sidney Verba and Margaret Weir Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Paradox of Representation David Lublin, 2020-11-10 In *The Paradox of Representation* David Lublin offers an unprecedented analysis of a vast range of rigorous empirical evidence that exposes the central paradox of racial representation Racial redistricting remains vital to the election of African Americans and Latinos but makes Congress less likely to adopt policies favored by blacks Lublin's evidence together with policy recommendations for improving minority representation will make observers of the political scene reconsider the avenues to fair representation Using data on all representatives elected to Congress between 1972 and 1994 Lublin examines the link between the racial composition of a congressional district and its representative's race as well as ideology The author confirms the view that specially drawn districts must exist to ensure the election of African Americans and Latinos He also shows however that a relatively small number of minorities in a district can lead to the election of a representative attentive to their interests When African Americans and Latinos make up 40 percent of a district according to Lublin's findings they have a strong liberalizing influence on representatives of both parties when they make up 55 percent the district is almost certain to elect a minority representative Lublin notes that particularly in the South the practice of concentrating minority populations into a small number of districts decreases the liberal influence in the remaining areas Thus a handful of minority representatives almost invariably Democrats win elections but so do a greater number of conservative Republicans The author proposes that establishing a balance between majority minority districts and districts where the minority population would be slightly more dispersed making up 40 percent of a total district would allow more African Americans to exercise more influence over their representatives

Enforcing and Challenging the Voting Rights Act Marsha Darling, 2014-02-24 Political redistricting is one of the most controversial issues in contemporary American society The practice of shaping voting districts to enhance the political representation of minorities at all levels of government emerged as a legal remedy for redressing the systematic historical exclusion of minority political representation It continues to have vocal and active defenders and detractors to this day with court rulings upholding or challenging the practice every year The controversies of redistricting have challenged America's commitment to participatory democracy and America's ability to account for its historical record of voting and racial discrimination The legal and historical arguments addressing the policy of redistricting and the constitutional issues surrounding it revolve around interpretations of the Fifteenth Amendment and America's ability to accept or reject race based solutions to political representation This three volume set brings together all the major legal cases and the most influential articles on the legal and historical arguments surrounding this issue

Race and Partisanship in California Redistricting Olivier Richomme, 2019-04-26 *Race and Partisanship in California Redistricting* covers fifty years of redistricting in California tracing the interaction between race and partisanship and directly tying California's successes and failures to the wider issue of redistricting in the United States

Redistricting, Race and Ethnicity in New York City, 1993

Race and Representation Georgia Anne Persons, 1997-01-01 Race and Representation is anchored by a symposium that focuses on efforts to enhance representation of African Americans in legislative bodies under the authority of the historic Voting Rights Act of 1965 and on recent court challenges to the constitutionality of redistricting plans drawn under that act. The chapters constitute an extension of an ongoing and protracted highly charged public debate. In her introduction Georgia A. Persons discusses how recent Supreme Court rulings such as in *Shaw v Reno*, *Miller v Johnson* and *Bush v Vera* have significantly redefined the meaning and permissible parameters of the Voting Rights Act. The articles in *Race and Representation* are refreshingly informative. They include case studies written by political scientists who became involved directly with events surrounding the theme of this volume. A new section *Reflections* is introduced; it will be reserved for commentary and analysis of an issue that captures the political spirit of the times. In the inaugural contribution J. Owens Smith reflects on the assault on liberal philosophy as a foundation for civil rights claims and offers an alternative philosophical prism for viewing and justifying such claims. This volume is essential for political scientists, African American studies specialists and scholars interested in law and government.

Race, Ethnicity, and the Politics of City Redistricting Joshua G. Behr, 2004-02-26 Nationwide study of the proposal and adoption of minority opportunity districts at the local level.

The Supreme Court in American Politics Howard Gillman, Cornell W. Clayton, 1999 For decades political scientists studying the Court have adopted behavioral approaches and focused on the relatively narrow question of how the justices' policy preferences influence their voting behavior. This emphasis has illuminated important aspects of Supreme Court politics but it has also left unaddressed many other important questions about this unique and fascinating institution. Drawing on the new institutionalism in the social sciences, the distinguished contributors to this volume attempt to fill this gap by exploring a variety of topics including the Court's institutional development and its relationship to broader political contexts such as party regimes, electoral systems, social movements, social change, legal precedents, political identities and historically evolving economic structures. The book's initial chapters examine the nature of the Court's distinctive norms as well as the development of its institutional powers and practice. A second section relates the development of Supreme Court politics to the historical development of other political institutions and social movements. Concluding chapters explore how its decision making in particular areas of law or periods of time is influenced by and influences its socio-political milieu. These contributions offer provocative insights regarding the Court's role in maintaining or disrupting political and economic structures as well as social structures and identities tied to ideology, class, race, gender and sexual orientation. *The Supreme Court in American Politics* shows how we can develop an enriched understanding of this institution and open up exciting new areas of research by placing it in the broader context of politics in the United States.
