**Explorations of Value**, 2022-01-04 The essays in *Explorations of Value* are drawn from work first presented at the 20th Conference of Value Inquiry They are not mere records of conference presentations The authors have reflected on their initial presentations They have rethought arguments in light of discussions at the conference They have revised their work All of this has combined to bring fresh ideas on important issues into carefully considered discussions The nineteen authors of the essays do not share a common viewpoint on all problems of value inquiry They are certainly not in agreement in their conclusions Their concerns however cluster around a recognizable body of questions Several of the authors raise fundamental questions on the nature of values and the possibility of giving them an objective status Some of the authors raise questions about where value inquiry becomes value advocacy They are also ready to ask whether or not advocacy is in the legitimate purview of philosophers A number of authors set out to examine conditions of moral practice and of harming or benefiting people in general Other authors show a concern for juxtaposing moral values and aesthetic values in some cases to observe similarities in some differences Finally a few authors focus on particular notions such as forgiveness intimacy and love that are central to our lives

*Morality Politics in American Cities* Elaine B. Sharp, Yvette M. Alex-Assensoh, 2005 Topless bars casino gambling needle exchange programs for drug addicts there s no question morality issues remain front and center in urban politics Presenting a systematic analysis of culture war issues at the local level Elaine Sharp shows how American cities deal with these ongoing concerns Drawing on a sample of ten strategically chosen cities she explains differences in how municipalities respond to controversies surrounding sex business abortion clinics legalized gambling gay rights and drug use By analyzing the relative importance of subculture economics and institutional arrangements in the disputes she points the way toward richer and more complete understanding of how different cities respond differently to these hot button issues Far more than a statistical study *Morality Politics in American Cities* is a collection of fascinating stories of real people grappling with down to earth issues and real life drama richly informative case studies that will captivate students and interested citizens alike Mayors public health directors activists and others speak their minds about the pros and cons of these controversies Here are officials in one city confronting the Vatican over funding for abortion services those in another battling a local university over its refusal to provide health benefits to gay partners of faculty members and still others mounting a massive community sponsored attack on topless clubs These stories provide detailed evidence to support classifications needed for comparing cities experience with each of the five morality issues They also corroborate inferences drawn from the comparisons by showing what considerations were in play as local officials grappled with these issues Overall the study shows that cultural factors usually

dominate policymaking in local politics except when specific economic interests are at stake and also observes that county level governments are more important than previously thought in terms of morality issue decisions As provocative as it is informative *Morality Politics in American Cities* demonstrates that such issues same sex marriage for example are multidimensional and often difficult to resolve Its conclusions however contingent mark an important step in the ongoing process of understanding important differences in approaches to these issues and clearly show how moral conflicts continue to define American politics
