Moral Language

Clare Heyward, Dominic Roser

Moral Language:

Moral Language Mary Gore Forrester, 1982 Widespread disagreements about matters of right and wrong have led many philosophers and non philosophers to conclude that moral knowledge is impossible Nevertheless we all make moral pronouncement every day In this book Mary Gore Forrester considers the nature of the language we use in ordinary life to make those moral evaluations what that language indicates about the criteria we use for making such evaluations and the conditions for determining the truth or falsity of moral evaluations Specialists in ordinary language philosophy will enjoy Forrester s arguments to the effect that the descriptivist s position on moral language is correct and that non descriptivist positions on the matter can be disproved [The Language of Morals](#) R. M. Hare, 1963-03-26 Hare has written a clear brief and readable introduction to ethics which looks at all the fundamental problems of the subject *Moral Language Across the Political Spectrum* Sze-Yuh Nina Wang, 2017 Across two studies we analyzed ideological differences in moral language use based on the moral categories posited by Moral Foundations Theory MFT fairness harm authority purity and ingroup loyalty In Study 1 we used word counting to assess the moral language used on U S political talk shows finding some support for MFT Democrats used more language related to fairness and Republicans used more language related to authority Republicans also used more language related to morality in general No other differences were significant In Study 2 we analyzed the Tweets of members of the 115th U S Congress and found that Democrats used more moral language across all MFT categories than Republicans A time series analysis revealed that these differences are larger after the 2016 Presidential election These findings suggest that there are differences in moral language use across the political spectrum and that these differences may be affected by political events *The Meaning of Moral Language* Carin Goodwin, 2011-09 It appears that what makes moral language interesting are the ways in which it is different from the language of some other known discourses In what way then is it being proposed that moral language is different And why does this difference present certain problems for theories about meaning in moral language It is being proposed that there exists a tension between the use of moral assertions and what sort of truth moral language is in fact capable of And it is the primary claim of this thesis that on account of the way in which we use moral language there is only one theory of meaning which can correctly capture our linguistic behaviour within moral discourse a verificationist theory about meaning *Passions, Politics and the Limits of Society* Heikki Haara, Koen Stapelbroek, Mikko Immanen, 2020-08-24 The 1st part of the volume engages with the theme of inclusion and exclusion in the history of ideas from different perspectives The 2nd part of the volume discusses debates on natural law human nature and political economy in early modern Europe Its contributions explore the sorts of political and moral visions that were relevant in post Hobbesian moral philosophy and the development of economic thought [CUET-PG Philosophy \[HUQP16\] Question Bank Book 3000+ Question Answer Chapter Wise As Per Updated Syllabus DIWAKAR EDUCATION HUB, 2024-02-01](#) CUET PG Philosophy HUQP16 Question Bank 3000 Chapter wise question With Explanations

The Nature of Moral Language Susan B. Matthews, 1969 "Real World" Ethics Robert J. Nash, 2002-01-01 Now more than ever with the explosion of new technologies and human service delivery systems innovative teaching methodologies and assessment instruments classic ethical questions and problems still remain The Second Edition of Robert Nash's bestseller expands on his earlier work with the addition of an extensive question and answer epilogue where Nash responds to questions about the first edition This new chapter incorporates the latest research in applied ethics teaching and in resolving ethical dilemmas in the professions The only applied ethics book written for both educators and human service professionals Real World Ethics is essential reading for everyone who find themselves faced with making critical ethical decisions in their work

Climate Justice in a Non-Ideal World Clare Heyward, Dominic Roser, 2016-07-01 Climate change is a pressing international political issue for which a practical but principled solution is urgently required Climate Justice in a Non Ideal World aims to make normative theorising on climate justice more relevant and applicable to political realities and public policy The motivation behind this edited collection is that normative theorising has something to offer even in an imperfect world mired by partial compliance and unfavourable circumstances In the last years a lively debate has sprung up in political philosophy about non ideal theory and there has also been an upsurge of interest in the various normative issues raised by climate change such as intergenerational justice transnational harm collective action or risk assessment However there has been little systematic discussion of the links between climate justice and non ideal theory even though the former would seem like a paradigm example of the relevance of the latter The aim of this edited volume is to address this In doing so the volume presents original work from leading experts on climate ethics including several who have participated in climate policy The first part of the book discusses those facets of the debate on climate justice that become relevant due to the shortcomings of current global action on climate change The second part makes specific suggestions for adjusting current policies and negotiating procedures in ways that are feasible in the relatively short term while still decreasing the distance between current climate policy and the ideal The chapters in the third and final part reflect upon how philosophical work can be brought to bear on the debates in climate science communication and politics
