

ties to their communities and profession. These are issues that become increasingly crucial to the settlement houses in subsequent decades. My current research deals in part with these questions. In addition, I would like to second Scimecca's suggestion that sociologists (and also social workers) become involved in using the tremendous amount of documentary evidence on settlement houses in public archives. The varying perspectives are bound to add much depth to our knowledge of this unique special institution.

Dorothy F. Zeligs. *Psychoanalysis and the Bible: A Study in Depth of Seven Leaders*. New York: Bloch, 1974. pp. xxiv + 348, \$10.00. (Reviewed by L. D. HANKOFF)

As the subtitle of the volume indicates, the author has undertaken a personality study of seven Old Testament characters — Abraham, Jacob, Joseph, Samuel, Saul, David, and Solomon — using the standard biblical text supplemented by a considerable available folklore as the basis for her application of psychoanalytic thinking to the subject. She has, in effect, provided us with seven psychoanalytic biographical studies in miniature, approaching the biblical material with respect and a background of interest in biblical matters which goes beyond a mere application of her profession to the topic. Dr. Zeligs, a psychologist with training in psychoanalysis, has written the book in lucid and simple terms with the interested layman in mind. This is evident in her inclusion of a glossary of psychoanalytic terms and the lack of technical referencing with regard to modern biblical scholarship.

Zeligs offers many interesting formulations concerning the unconscious strivings of her seven characters and possible explanations for some of the puzzling events in the Bible. We are told in a brief forward by Dr. Joost A. M. Meerloo that the present form of applied psychoanalysis is comparable to the approach of good exegesis generally. This raises some general issues with regard to Zeligs' techniques of applied psychoanalysis.

The issue of the context of the psychoanalytic focus is perhaps the most basic concern. The author has chosen to use mainly the biblical account of the character as a basis for a psychoanalytic formulation. This is bound to introduce distortions if the assumption of the researcher is at variance with the intention of the biblical writer. For what purpose was the Bible written and is it suitable for psychoanalytic study as biographical material? The author often uses the scriptural text as if it were an analysand's free association, interpreting portions as indicating psychodynamic relationships in the character's unconscious. For example, she refers to an apparent unclear and faltering passage about King David in the Book of Samuel as possible evidence of David's "resistance" to dealing with sensitive material (p. 212). I believe it is an error to consider the Bible's narrative as in any way comparable to modern biography. The Old Testament gives an account of the relationship of a people to God and any biographical details which have been included are incidental to that task.

The present psychoanalytic study of the historical character is prone to the error of ignoring the context because of the nature of the psychoanalytic study process. The psychoanalytic method is of value clinically in looking at the individual in terms of individual defenses, coping mechanisms, and motivating forces. There is an emphasis by the psychoanalyst on universal symbols and the interpretation of behavior in terms of individual psychology. The broader context is not always in sharp focus. Thus we find our
