Louis Guttman on Theory and Methodology Louis Guttman, 1994 Conceptual Categories and the Structure of Reality: Theoretical and Empirical Approaches Paul M.W. Hackett, 2019-01-21 In this eBook *Conceptual Categories and the Structure of Reality* the title very well describes the book's content. Within the book's pages a selection of academics from a variety of human behaviour, human social science, and humanities disciplines write about their research, all of which can be typified by their consideration of how categories are used to structure understanding of phenomena. These authors have considered how reality may be understood through notions such as categorial and structural ontologies, part-whole relationships, mereology, the qualitative, quantitative, and philosophical use of the facet theory approach to research, mapping sentences and declarative mapping, sentence hermeneutics, concepts and constructs, similarities and differences. The resulting collection presents the foregoing conceptual and empirical approaches to knowledge development in general: chapter 1 Phillips and Wislons review of compositional syntax in bird calls; chapter 2 neurobehavioral decision systems; chapter 4 Foxall representations of human psychological processes; chapter 5 Juan Miguel Lopez Gil, Rosa Gil, Roberto Garcia, free associations, mirroring, and its relation to self and world-related concepts; chapter 6 Martin Kučka, Radek, Trnka, Ale Antonín, Kubná, Jiříka, local knowledge, and going beyond the data; chapter 7 Steven Phillips, categorial etiologies of speech sound disorders; chapter 8 Kelly Farquharson, similarity of visual appearance; chapter 9 Nao Nakatsuji, Hisayasu Ihara, Takeharu Seno, Hiroshi Ito, and a consideration of the seminal writing of David Oderberg's on the categorial classification of reality; chapter 10 Hackett.

Psychology and Philosophy of Abstract Art Paul M.W. Hackett, 2016-05-25 This book examines how we perceive and understand abstract art in contrast to artworks that represent reality. Philosophical, psychological, and neuroscience research, including the work of philosopher Paul Crowther, are considered, and out of these approaches a complex model is developed to account for this experience. The understanding embodied in this model is rooted in facet theory, mapping sentences, and partially ordered analyses, which together provide a comprehensive understanding of the perceptual experience of abstract art.

Mereologies, Ontologies, and Facets Paul M. W. Hackett, 2018-07-15 The assignment events, objects, state of beings, etc. to an experiential category is a fundamental activity carried out by human and by other animals. So rudimentary are the processes involved in categorizing that it is indeed impossible to imagine conscious awareness to exist without the presence of categories. A considerable body of writing exists on categories, dating from the times of Classical philosophy. Plato developed a categorial ontology, and Aristotle produced one of the earliest examples of a complex understanding of basic ontologies. A number of other categorially structured ontologies have been proposed, including those by Lowe, Westerhoff, Chisholm, etc. The book is an edited collection of up-to-the-moment essays that address critical aspects on the understanding of categories and categorial systems. The perspectives included in the book are drawn from philosophy, psychology, theology, divinity, comparative cognition, and facet theory. The authors are all renowned experts in the area of their

writing Topics addressed include both contemporary advances in the understanding of perennial debates and latest thinking upon how categories are employed to structure our experiences of the world we live in The book is distinct as being written by philosophers and psychologists The book is a collection of writings from selected academics at the fore of debates and understandings of categories in contemporary thought The text provides a single source for contemporary scholarship in categories No single text that brings together expositions of categorial experiences for students and academics within the above listed disciplines

Louis Guttman on Theory and Methodology Louis Guttman,1994 Drawing on a large number of periodicals books and unpublished papers this volume offers a representative overview of Guttman s work and demonstrates its utility for cumulative theory development in sociology psychology education statistics and other disciplines

The Perceptual Structure of Three-Dimensional Art Paul M.W. Hackett,2016-12-26 This book deals with philosophical aspects regarding the perception of spatial relationships in two and three dimensional art It provides a structural understanding of how art is perceived within the space created by the artwork and employs a mapping sentence and partial order mereology to model perceptual structure It reviews the writing of philosophers such as Paul Crowther and art theorists such as Krauss to establish the need for this research The ontological model established Paul Crowther is used to guide an interactive account of his ontology in the interpretations of the perceptual process of three dimensional abstract art to allow the formulation of a more comprehensive philosophical account The book uniquely combines structuralist and post structuralist approaches to artistic perception and understanding with a conceptual structure from facet theory which is clarified with the help of a mapping sentence and partial order mereology

The Jews of France Today Erik H. Cohen Z"l,2011-08-11 Recent nation wide surveys of the Jews of France yielded a detailed picture of this community one of the largest Jewish Diaspora populations with a long and rich history This book presents results and analyses of this survey for the first time in English Key issues explored include demographics representations of Jewish identity expressions of community solidarity social issues and values Data was analyzed using multi dimensional techniques revealing underlying structural relationships and an axiological typology The translation of the French edition was expanded for accessibility to an English speaking audience including a background on history socio political climate and related philosophical works The cumulative result is the most up to date and comprehensive look at the Jews of France at the turn of the third millennium the empirical centerpiece of Cohen s study is sound invaluable and often highly illuminating In the short space provided this reviewer could not fully do justice to the wealth of information presented there Ethan Katz University of Cincinnati
