 collection of works that comprehensively address both the myriad geomorphological landscapes of the Maltese Islands and
 how their evolution has been shaped over various time scales by different sets of processes Additionally the work highlights
 how the small geographical setting of the Maltese Islands helped to closely connect these landscapes with Maltese society
 and as a result they have evolved from stand alone examples of geomorphology to important backdrops of Maltese cultural
 identity Most of the contributing authors are academics both local and foreign with a research focus on the geomorphology of
 the Maltese Islands However the editors have also and purposefully chosen other contributors from governmental institutions
 and research agencies who complement the geomorphological research with their proactive work in selected case studies on

 Topographic mapping plays a basic and important role within the extensive field of cartography In recent years this type of
 mapping has become somewhat neglected and available literature is normally restricted to details concerning the
 programmes of individual countries often presented in the form of monographs Topographic maps are essential tools for use
 in development projects resource exploitation the planning of construction infrastructure and recreation Furthermore they
 give a detailed illustration of the relative degrees of development of areas within a landscape and are thus unique in
 demonstrating the cultural status of a country This book is the first of three volumes and provides an introduction to world
 topographic mapping giving details and examples of topographic maps from Western Europe North America and Australasia
 The information supplied for each country consists of a text including a brief history of the development of topographic
 mapping geodetic data map scales and series as well as extracts of maps and index sheets illustrating the present status of
 map coverage within that country There is currently no other work employing the approach adopted in assembling this
 inventory This work is a comprehensive and important reference and source book for information in the field of topographic
