Marginal Workers Marginal Jobs:

Marginal Workers, Marginal Jobs Teresa A. Sullivan, 2014-11-06 Unemployment levels have received a great deal of attention and discussion in recent years However another labor category underemployment has virtually been ignored Underutilized or underemployed workers are those who are experiencing inadequate hours of work insufficient levels of income and mismatch of occupation and skills *Marginal Workers Marginal Jobs* addresses two principal issues how can we measure underemployment and how can we explain its prevalence To answer the first question Teresa Sullivan examines yardsticks in use demonstrates their inadequacy and develops a different measure that is easy to interpret and is usable by both demographers and economists In answering the second she analyzes 1960 and 1970 census data to determine the relative effects of population composition and job structure on levels of employment One of the important contributions of Sullivan s study is to distinguish between marginal workers and marginal jobs in explaining underutilization Previous explanations including the widely used dual market theory have not stressed this analytic distinction In addition her work accounts separately for the various types of marginality and seeks to show the condition of workers who are marginal on more than one count for example those who are both young and black or old and female A provocative study based on large samples of the U S population this book raises important questions about a critical subject and makes a significant contribution to the theory of underutilization

Work, Employment and Flexibility Peter Holland, Chris Brewster, Nadia K. Kougiannou, 2024-06-05 This insightful book examines the evolving landscape of work in the context of rapidly developing information and communication technology and Artificial Intelligence It argues that while in the twentieth century there was a standardisation of work style the twenty first century is seeing the creation of ever more flexible forms of work epitomised by the rise of the gig economy

Hopeful Workers, Marginal Jobs Daniel Flaming, 2016 There is extensive evidence of a growing informal labor force in Los Angeles City and County along with stagnant employment in the formal labor market Between 2000 and 2004 the working age population in the county grew by 4.9 percent but the number of wage and salary jobs i.e. the formal economy declined by 2.3 percent This trend in Los Angeles economy is in distinct contrast to national trends When we look at the United States economy we see a much narrower gap between the number of household members who report being employed and the number of workers that employers report having on their payrolls The most compelling reason for workers to accept informal jobs is economic desperation We have evidence that many working poor residents of the city and county including US citizens accept jobs in

the informal sector but the group of workers who have the greatest difficulty finding employment is recent immigrants The evidence suggests that non citizen immigrants are a major component of the informal labor force Foreign born persons made up an estimated 11 percent of the US population 36 percent of Los Angeles County s population and 40 percent of Los Angeles City s population in 2000 We project that undocumented immigrants account for 25 percent of the foreign born population of the city and 23 percent in the county Our best estimate is that on a typical day in 2004 there were 679 000 informal workers in the county and 303 800 in the city These workers are estimated to account for 15 percent of the county labor force and 16 percent of the city s labor force Undocumented workers are estimated to make up 61 percent of the informal labor force for the county and 65 percent for the city
