

R

THE COMPARATIVE CASE STUDY APPROACH IN PUBLIC ADMINISTRATION

Robert Agranoff and Beryl A. Radin

ABSTRACT

This paper discusses the use of the comparative case research methodology in public administration. In this approach, cases are systematically developed through use of multiple sources of evidence, investigating phenomena within their contexts, and then are analyzed by comparison. The use of comparative case research can be as rigorous and systematic as virtually any other method. Moreover, there are many subjects in public administration where research within a phenomena's context provides better evidence and opportunity for explanation. The nature and use of comparative case analysis in inquiry is initially explained. Then case development and comparison analysis as well as key concerns of research design is explained. Next, the utility of this method is analyzed. The paper concludes with a discussion of the problems and opportunities with use of this method when studying public administration.
