### **The Automobile Industry** Ralph Cecil Epstein,1928      *U.S. Automotive Industry* Stephen Cooney,Brent D.

Yacobucci,2007 Over one million Americans are employed in manufacturing motor vehicles equipment and parts But the industry has changed dramatically since the U S Big Three motor vehicle corporations General Motors Ford and Chrysler produced the overwhelming majority of cars and light trucks sold in the United States and directly employed many people themselves By 2003 most passenger cars sold in the U S market were either imported or manufactured by foreign based producers at new North American plants so called transplant facilities The Big Three now dominate only in light trucks and are also now being challenged there by the foreign brands The Big Three have shed about 600 000 U S jobs since 1980 while about one quarter of Americans employed in automotive manufacturing nearly 300 000 work for the foreign owned companies It is clear that the U S automotive industry has undergone many drastic changes that have had a net adverse effect on American interests This book examines the causes of these changes Congressional acts increasingly stringent emission laws the effects of NAFTA labour unions and globalisation are all within the scope of this book

Industry Task Force,1975      **Making and Selling Cars** James M. Rubenstein,2003-04-01 From the creation of fast food to the design of cities to the character of our landscape the automobile has shaped nearly every aspect of modern American life

In fact the U S motor vehicle industry is the largest manufacturing industry in the world James Rubenstein documents the story of the automotive industry which despite its power is an industry constantly struggling to redefine itself and assure its success Making and Selling Cars Innovation and Change in the U S Automotive Industry shows how this industry made adjustments and fostered innovations in both production and marketing in order to remain a viable force throughout the twentieth century Rubenstein builds his study of the American auto industry with care taking the reader through this quintessentially modern history of production and consumption Avoiding jargon while never over simplifying Rubenstein gives a detailed and straightforward account of both the production and merchandising of cars We learn how the industry began and about its methods for building cars and the modern American marketplace Along the way there were many missteps and challenges the Edsel the fuel crisis and the ascendancy of Japanese cars in the 1980s The industry met these types of problems with new techniques and approaches To demonstrate this Rubenstein gives the reader examples of how the auto industry used to work which he alternates with chapters showing how the industry has reinvented itself Making and Selling Cars explains why the U S automotive industry has been and remains a vigorous shaper of the American economy
