This book constitutes the proceedings of the 9th Latin American Conference on High Performance Computing CARLA 2022 held in Porto Alegre, Brazil, in September 2022. The 16 full papers presented in this volume were carefully reviewed and selected from 56 submissions. CARLA, the Latin American High Performance Computing Conference, is an international academic meeting aimed at providing a forum to foster the growth and strength of the High Performance Computing (HPC) community in Latin America and the Caribbean through the exchange and dissemination of new ideas, techniques, and research in HPC and its application areas. **Proceedings of the Second Workshop on Scalable Algorithms for Large-scale Systems** Vassil Alexandrov, 2011. **High Performance Computing and Applications** Wu Zhang, Zhangxin Chen, Craig C. Douglas, Weiqin Tong, 2010-03-10. The Second International Conference on High Performance Computing and Applications (HPCA 2009) was a follow-up event of the successful HPCA 2004. It was held in Shanghai, a beautiful, active, and modern city in China, August 10-12, 2009. It served as a forum to present current work by researchers and software developers from around the world, as well as to highlight activities in the high performance computing area. It aimed to bring together research scientists, application pioneers, and software developers to discuss problems and solutions and to identify new issues in this area. This conference emphasized the development and study of novel approaches for high performance computing: the design and analysis of high performance numerical algorithms and their scientific, engineering, and industrial applications. It offered the conference participants a great opportunity to exchange the latest research results, heighten international collaboration, and discuss future research ideas in HPCA. In addition to 24 invited presentations, the conference received over 300 contributed submissions from over ten countries and regions worldwide, about 70 of which were accepted for presentation at HPCA 2009. The conference proceedings contain some of the invited presentations and contributed submissions and cover such research areas of interest as numerical algorithms and solutions, high performance and grid computing, novel approaches to high performance computing, massive data storage and processing, hardware acceleration, and their wide applications. **Annual Review of Scalable Computing** Yuen Chung Kwong, 2000. This book provides a forum for researchers in scalable computing to publish extended length articles on significant new developments. An article may present comprehensive results from a major project, review recent work in a sub-domain, or

expound new ideas in a detailed tutorial fashion at a length which most journals and conference proceedings cannot accommodate The five articles in this book give an excellent illustration of the different types of material requiring such extensive treatment and should serve well to encourage future authors with similar ideas to consider publishing in the Series on Scalable Computing
