Principles Of Management Science:

The Principles of Scientific Management Frederick Winslow Taylor, 1911 The classic study on improving efficiency and labor productivity through the close study and observation of work

The Principles of Scientific Management Frederick Winslow Taylor, 2004-10 President Roosevelt in his address to the Governors at the White House prophetically remarked that The conservation of our national resources is only preliminary to the larger question of national efficiency The whole country at once recognized the importance of conserving our material resources and a large movement has been started which will be effective in accomplishing this object As yet however we have but vaguely appreciated the importance of the larger question of increasing our national efficiency We can see our forests vanishing our water powers going to waste our soil being carried by floods into the sea and the end of our coal and our iron is in sight But our larger wastes of human effort which go on every day through such of our acts as are blundering ill directed or inefficient and which Mr Roosevelt refers to as a lack of national efficiency are less visible less tangible and are but vaguely appreciated
