

UN Fundamental Principles of Official Statistics

Principle 1 Relevance, impartiality and equal access

States that official statistics are to be compiled and made available by official statistical agencies to honour citizens' entitlement to public information.

Principle 2 Professional standards, scientific principles and professional ethics

States that statistical agencies need to determine their methods and procedures according to strictly professional considerations, including scientific principles and professional ethics.

Principle 3 Accountability and transparency

Charges the statistical agencies to present their information according to scientific standards on the sources, methods, and procedures of the statistics.

Principle 4 Prevention of misuse

States that statistical agencies are entitled to comment on erroneous interpretation and misuse of statistics.

Principle 5 Sources of official statistics

Says that data for statistical purposes may be drawn from all types of sources, be they surveys or administrative records.

Principle 6 Confidentiality

Prescribes the obligation to respect statistical confidentiality.

Principle 7 Legislation

That the laws, regulations and measures under which the statistical systems operate are to be made public.

Principle 8 National coordination

Spells out that coordination among statistical agencies within countries is essential.

Principle 9 Use of international standards

Recommends the use by statistical agencies in each country of international concepts, classifications and methods.

Principle 10 International cooperation

Recommends bilateral and multilateral cooperation in statistics as that contributes to improving systems of official statistics in all countries.
