Principles of Engineering Drawing for Technical Students Charles C. Leeds,Lond. &c,1923 **Principles of Engineering Drawing for Technical Students** Charles Carley Leeds,2015-06-25 Excerpt from Principles of Engineering Drawing for Technical Students The subject matter of this text has been carefully prepared and arranged with a view to meeting the needs of Freshman students in Engineering Schools and Colleges It contains in addition ample material for the requirements of more advanced men who are interested in Engineering Drawing The ability to use engineering drawings intelligently presupposes the power to make mental translations from orthographic projection drawings into perspective and from perspective back to orthographic as these processes are constantly taking place in the various departments of

manufacturing plants engaged in engineering construction Under the theory that as a boy grows up he develops a natural tendency to visualize objects in perspective form the author has made use of angular perspective as a means of introducing the subject of orthographic projection believing that a sound grasp of the latter subject may be obtained by comparing it with a known subject After the fundamentals of both perspective and orthographic have been studied thoroughly we apply this instruction immediately when taking up freehand sketching for here the student is required to use his reasoning faculties to translate perspective sketches into freehand orthographic projection drawings About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
