September 12th Thinking:

Counterterrorism Ronald Crelinsten, 2013-04-17 Terrorism has emerged as one of the most problematic issues facing national governments and the international community in the 21st century. But how is it possible to counter terrorism in a world in which governance is still dominated by the nation state? Are we seeing new forms of terrorist activity in the wake of 9/11? Are pre-9/11 approaches still valid? How can we combat and control diverse threats of multiple origin? Who should be responsible for countering terrorism and in what circumstances? In this incisive new book, Ronald Crelinsten seeks to provide answers to these pressing questions, challenging readers to think beyond disciplinary and jurisdictional boundaries. He presents an up-to-date and comprehensive introduction to the difficulties and obstacles related to countering terrorism in democratic societies. The counterterrorism framework that he develops in this book reflects the complex world in which we live. The different approaches to counterterrorism provide the organizing theme of the book and help the reader to understand and to appreciate the full range of options available. The book includes a host of contemporary examples and further readings, compares and contrasts pre and post-9/11 approaches, critically evaluates the post-9/11 war on terror, moves beyond a purely state-centric focus to include non-state actors and institutions, combines hard and soft power approaches, considers prevention, preparedness, response, and recovery. *Counterterrorism* will be an indispensable guide for students, researchers, practitioners, and general readers wanting to broaden their knowledge of the possibilities and limitations of counterterrorism today.

Cultures of Counterterrorism Silvia D'Amato, 2019-02-21 This book investigates counterterrorism responses from a strategic culturalist perspective, focusing on France and Italy in the post-9/11 era. Terrorism occupies a predominant space within contemporary political debate across all European countries. Recent attacks in Europe have raised many questions about the status of counterterrorism structures within European countries, revealing a wide range of practical as well as discursive security implications. This work provides an original contribution to the understanding of counterterrorism by asking how values, norms, and a shared sense of identity matter in policy dynamics. It explores and assesses which cultural elements are relevant for the fight against terrorism and investigates the impact which these elements can have on practical approaches to terrorism. Despite the current attention to terrorist attacks in Europe, the cases of France and Italy in counterterrorism affairs are particularly overlooked by the existing literature. This book analyses questions and examines the strategy of these two countries through the instruments offered by the culturalist approaches to strategy. This book will be of much interest to students of terrorism studies, discourse analysis, European politics, security studies, and international relations in general.
