Old Wars:

New and Old Wars Mary Kaldor, 2013-04-26 Mary Kaldor's *New and Old Wars* has fundamentally changed the way both scholars and policy makers understand contemporary war and conflict. In the context of globalization, this path-breaking book has shown that what we think of as war—that is to say, war between states in which the aim is to inflict maximum violence—is becoming an anachronism. In its place is a new type of organized violence or new wars, which could be described as a mixture of war, organized crime, and massive violations of human rights. The actors are both global and local, public and private. The wars are fought for particularistic political goals using tactics of terror and destabilization that are theoretically outlawed by the rules of modern warfare. Kaldor's analysis offers a basis for a cosmopolitan political response to these wars in which the monopoly of legitimate organized violence is reconstructed on a transnational basis and international peacekeeping is reconceptualized as cosmopolitan law enforcement. This approach also has implications for the reconstruction of civil society, political institutions, and economic and social relations. This third edition has been fully revised and updated. Kaldor has added an afterword answering the critics of the New Wars argument and in a new chapter shows how old war thinking in Afghanistan and Iraq greatly exacerbated what turned out to be in many ways archetypal new wars, characterized by identity politics, a criminalized war economy, and civilians as the main victims. Like its predecessors, the third edition of *New and Old Wars* will be essential reading for students of international relations, politics, and conflict studies, as well as to all those interested in the changing nature and prospect of warfare. P. Clarke, Thomas A. O'Donoghue, 2013-07-18 How do different contexts influence the nature and character of school leadership? This book is predicated on the simple yet profound observation that school leadership can only be understood within the context in which it is exercised. The observation is particularly valid in relation to post-conflict societies, especially when they have eventuated from new wars. Schools in these contexts face highly complex circumstances and a level of environmental turbulence requiring different kinds of leadership from those operating in less complicated and relatively stable situations. By assembling an impressive array of international experts, this book investigates a much neglected area of research. Each chapter highlights the importance of context for understanding the realities of school leadership and reveals the challenges and influences that school leaders face, as well as the strategies they adopt to deal with the complexities of their work. In particular, valuable insights are provided into how intractable problems faced by schools can affect student, professional, and organizational learning agendas. There are also important glimpses of the progression that can be made in schools by enhancing the curriculum, energizing teaching capacity, and optimizing leadership capacity. Depictions of post-new war environments include Angola, Ghana, Sri Lanka, Rwanda, Kenya, Solomon Islands, Lebanon, Kosovo, Timor-Leste, and Northern

Global Phenomena and Social Sciences Jean-Sylvestre Bergé, Sophie Harnay, Ulrike Mayrhofer, Lionel Obadia, 2017-10-26 This book offers new perspectives on global phenomena that play a major role in today's society and deeply shape the actions of individuals, organizations and nations. In a complex and rapidly changing environment, decision makers need to gain a better understanding of global phenomena to adapt and to anticipate the evolution of the global context. The authors, ten renowned international scholars of anthropology, economics, law, management and political science, propose an interdisciplinary and comparative approach to social sciences. They analyse how international phenomena such as globalisation or transnationalisation transform the disciplines of social sciences from an epistemological standpoint. Explaining what global means in different disciplines, the authors analyse several global phenomena that characterise today's international environment such as the circulation of norms and ideas, the linkages between war and globalization, corporate governance and the impact of multinational enterprises on sustainable development and poverty reduction. Providing examples of analytical disciplinary approaches and guidelines for decision makers in a fast-changing global context, this book will be useful to scholars and students of anthropology, economics, law, management and political science as well as practitioners in the private and public sectors.

Just War Thinking Eric Patterson, 2009-01-01 Just War Thinking reconsiders the intersection between morality and pragmatics in foreign policy and modern warfare. The book argues that a political ethic of responsibility should motivate the contemporary application of military force by states in order to protect international security and human life, considering the challenges posed by today's new wars, targeted killing, humanitarian intervention, terrorism, jus post bellum and the influences of public opinion and supranational institutions.

Health Care in Contexts of Risk, Uncertainty, and Hybridity Daniel Messelken, David Winkler, 2021-11-23 This book sheds light on various ethical challenges military and humanitarian health care personnel HCP face while working in adverse conditions. Contexts of armed conflict, hybrid wars or other forms of violence, short of war, as well as natural disasters, all have in common that ordinary circumstances can no longer be taken for granted. Hence, the provision of health care has to adapt, for example, to a different level of risk, to scarce resources or uncommon approaches due to external incentives or requirements. This affects the practice of health care as well as its ethics. This book offers a panoramic overview on various challenges healthcare faces in extraordinary situations and provides new insights from practitioners as well as from academic scholars' perspectives.

Causes for the Civil War in Northern Uganda Mareike Peters, 2020-06-09 Seminar paper from the year 2016 in the subject Politics Region Africa grade 2.0 Otto von Guericke University Magdeburg Politikwissenschaft course. State and Non State Actors in Violent Conflict. Language: English. Abstract: Uganda, a landlocked country in Eastern Africa, has struggled with violent conflicts since the end of colonial rule in 1962. The

emergence of the Lord s Resistance Army LRA in 1987 in the northern region is one of the infamous examples of the violence the country had to endure Since 2006 the LRA is no threat to Uganda anymore as the movement withdraw to the neighbouring countries and has lost a significant amount of strength Several scholars offered different explanations as to why the LRA was able to gain their power and remained to terrorize the Ugandan population for such a long period of time Many believe that the spiritual system is the main driver behind the high number of fighters and the success of their leader Joseph Kony But the use of extreme violence against the government military forces as well as against the civilian population is one of the aspects which let the LRA maintain their crusade However the strongest argument lies within the north south divide of the country which led to inequality and can be seen as one of the main reasons for the conflict This paper will examine the causes for civil wars with the focus on the conflict in northern Uganda **The Fortnightly Review** ,1915
