High Performance Embedded Architectures and Compilers Tom Conte, Nacho Navarro, Wen-mei W. Hwu, Mateo Valero, Theo Ungerer, 2005-10-27 As Chairmen of HiPEAC 2005 we have the pleasure of welcoming you to the proceedings of the first international conference promoted by the HiPEAC Network of Excellence During the last year HiPEAC has been building its clusters of researchers in computer architecture and advanced compiler techniques for embedded and high performance computers Recently the Summer School has been the seed for a fruitful collaboration of renowned international faculty and young researchers from 23 countries with fresh new ideas Now the conference promises to be among the premier forums for discussion and debate on these research topics The prestige of a symposium is mainly determined by the quality of its technical program This first program lived up to our high expectations thanks to the large number of strong submissions The Program Committee received a total of 84 submissions only 17 were selected for presentation as full length papers and another one as an invited paper Each paper was rigorously reviewed by three Program Committee members and at least one external referee Many reviewers spent a great amount of effort to provide detailed feedback In many cases such feedback along with constructive shepherding resulted in dramatic improvement in the quality of accepted papers The names of the Program Committee members and the referees are listed in the proceedings The net result of this team effort is that the symposium proceedings include outstanding contributions by authors from nine countries in three continents In addition to paper presentations this first HiPEAC conference featured two keynotes delivered by prominent researchers from industry and academia

Transactions on High-Performance Embedded Architectures and Compilers I Mike O'Boyle, Francois Bodin, Marcelo Cintra, Sally A. Widen the Window Elizabeth A. Stanley, PhD, 2019-09-24 I don't think I've ever read a book that paints such a complex and accurate landscape of what it is like to live with the legacy of trauma as this book does while offering a comprehensive approach to healing from the foreword by Bessel van der Kolk A pioneering researcher gives us a new understanding of stress and trauma as well as the tools to heal and thrive Stress is our internal response to an experience that our brain perceives as threatening or challenging Trauma is our response to an experience in which we feel powerless or lacking agency Until now researchers have treated these conditions as different but they actually lie along a continuum Dr Elizabeth Stanley explains the significance of this continuum how it affects our resilience in the face of challenge and why an event that's stressful for one person can be traumatizing for another This groundbreaking book examines the cultural norms that impede resilience in America especially our collective tendency to disconnect stress from its potentially extreme

consequences and override our need to recover It explains the science of how to direct our attention to perform under stress and recover from trauma With training we can access agency even in extreme stress environments In fact any maladaptive behavior or response conditioned through stress or trauma can with intentionality and understanding be reconditioned and healed The key is to use strategies that access not just the thinking brain but also the survival brain By directing our attention in particular ways we can widen the window within which our thinking brain and survival brain work together cooperatively When we use awareness to regulate our biology this way we can access our best uniquely human qualities our compassion courage curiosity creativity and connection with others By building our resilience we can train ourselves to make wise decisions and access choice even during times of incredible stress uncertainty and change With stories from men and women Dr Stanley has trained in settings as varied as military bases healthcare facilities and Capitol Hill as well as her own striking experiences with stress and trauma she gives readers hands on strategies they can use themselves whether they want to perform under pressure or heal from traumatic experience while at the same time pointing our understanding in a new direction
