## **Researching Disability Issues:**

EBOOK: Researching Disability Issues Michelle Moore, Sarah Beazley, June Maelzer, 1998-03-16 This book is designed to meet a growing need for clear illustrations of how to carry out research which seeks to explore disability issues It aims to demonstrate the value of a critical attention to social rather than medical starting points for researching disability through reviewing a variety of studies which look at different aspects of disabled people s lives Different methodological approaches and research techniques are considered ranging from analysis of observation data concerning disabled children in schools to rich conversation based data which focuses on family life A central theme concerns the pivotal role of disabled people in research The book provides substantive examples of the dilemmas which face researchers and connects these to ideas for individual personal action Disabled and non disabled researchers professionals and students from a wide range of disciplines will find the presentation of both research findings and debates informative and of interest

**Disability, Human Rights and Society** , **Researching Disability Issues** Moore, Michelle, Beazley, Sarah, Maelzer, June, 1998-03-01 This book is designed to meet a growing need for clear illustrations of how to carry out research which seeks to explore disability issues It aims to demonstrate the value of a critical attention to social rather than medical starting points for researching disability through reviewing a variety of studies which look at different aspects of disabled people s lives

**Purpose, Process and Future Direction of Disability Research** Simoni Symeonidou, Karen Beauchamp-Pryor, 2013-11-19 Purpose Process and Future Direction of Disability Research brings together the collective experience of an international network of early career researchers who set out to discuss the complexity of researching disability As newcomers to the research process the researchers detail their apprehensions about embarking on doctoral research together with the struggles they experienced along the way and importantly the motivation that drove them to complete their projects Contributors present an open and honest reflection on their research experience Interests motives and values which underpinned the direction of their research projects are explored questioning whether their beliefs were subsequently challenged changed or validated Research decisions were driven by a range and combination of personal experience of disability and professional experience of working with disabled people The influence of personal and professional approaches within research is addressed along with subsequent dilemmas Ideological battles are detailed which include the place of the social model of disability in research and the oppressive nature of doing disability research The researchers identify and examine their experience throughout the process of analysis writing up and presenting data and question how far their data resulted in confusions or conclusions Contributors explore their moral and political position as researchers and the potential influence on the validity of their findings Issues about dissemination and the impact of their findings are also considered Future research aims and challenges are identified with each contributor critically questioning the unfinished business that their research has involved

Essential reading recommended for students and supervisors engaged in disability studies and inclusive education

**Researching Disability: Methodological Issues** Economic and Social Research Council,1989     Researching Disability Sport Ben Powis,James Brighton,P. David Howe,2022-12-12 Marking a new direction for disability sport scholarship this book explores cutting edge issues and engages creatively with contemporary approaches to research in this important emerging discipline Featuring contributions from leading and up and coming scholars around the world the book s wide ranging chapters offer novel perspectives on the relationship between theory method and empiricism in disability sport research and highlight how researchers can be both innovative and informed when entering the field It also explores methodological considerations when conducting disability sport research including social cultural and political reflections of the research process from disabled and non disabled academics This much needed resource supports disability sport scholars in developing a conceptual grounding in the subject and establishes a space for intersectional accounts of sport and physical activity which challenge homogenous understandings of disability This book is essential reading for any student or researcher working in disability sport adapted physical activity or adapted physical education and a valuable reference for anybody with an interest in the sociology of sport disability studies cultural studies the body or research methodology

Researching Disability University College, Dublin. Equality Studies Centre,Máiríde Woods,Ireland. Commission on the Status of People with Disabilities,1996     Doing Disability Research Colin Barnes,Geoffrey Mercer,1997     *Social Research and Disability* Ciaran Burke,Bronagh Byrne,2020-12-29 Social Research and Disability argues that the contemporary rules of sociological methods outlined in numerous research methods texts make a number of assumptions concerning the researcher including ambivalence sight hearing and speech In short the disabled researcher is not considered when outlining the requirements of particular methods Drawing upon these considerations the volume emphasizes how disabled researchers negotiate the empirical process in light of disability whilst retaining the scientific rigour of the method It also considers the negative consequences arising from disabled researchers attempts at passing and the benefits that can emerge from a reflexive approach to method This innovative and original text will for the first time bring together research active academics who identify as being disabled to consider experiences of being disabled within a largely ableist academy as well as strategies employed and issues faced when conducting empirical research The driving force of this volume is to provide the blueprints for bringing how we conduct social research to the same standards and vision as how the social world is understood multi faceted and intersectional To this end this edited collection advocates for a sociological future that values the presence of disabled researchers and normalises research methods that are inclusive and accessible The interdisciplinary focus of Social Research and Disability offers a uniquely broad primary market This volume will be of interest not only to the student market but also to established academics within the social sciences     **Disability Research Today** Tom Shakespeare,2015-03-05 Grouped around four central themes illness and impairment disabling processes care and control and communication and representations this collection offers a fresh perspective on disability research showing how theory

and data can be brought together in new and exciting ways Disability Research Today starts by showing how engaging with issues around illness and impairment is vital to a multidisciplinary understanding of disability as a social process The second section explores factors that affect disabled people such as homelessness violence and unemployment The third section turns to social care and how disabled people are prevented from living with independence and dignity Finally the last section examines how different imagery and technology impacts our understandings of disability and deafness Showcasing empirical work from a range of countries including Japan Norway Italy Australia India the UK Turkey Finland and Iceland this collection shows how disability studies can be simultaneously sophisticated accessible and policy relevant Disability Research Today is suitable for students and researchers in disability studies sociology social policy social work nursing and health studies

**The Dynamics of Disability** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Institute of Medicine, Board on Health Care Services, Committee to Review the Social Security Administration's Disability Decision Process Research, 2002-08-16 The Social Security disability program faces urgent challenges more people receiving benefits than ever before the prospect of even more claimants as baby boomers age changing attitudes culminating in the Americans With Disabilities Act Disability is now understood as a dynamic process and Social Security must comprehend that process to plan adequately for the times ahead The Dynamics of Disability provides expert analysis and recommendations in key areas Understanding the current social economic and physical environmental factors in determining eligibility for disability benefits Developing and implementing a monitoring system to measure and track trends in work disability Improving the process for making decisions on disability claims Building Social Security's capacity for conducting needed research This book provides a wealth of detail on the workings of the Social Security disability program recent and emerging disability trends issues and previous experience in researching disability and more It will be of primary interest to federal policy makers the Congress and researchers and it will be useful to state disability officials medical and rehabilitation professionals and the disability community Researching Disability, 1992

**Handbook of Disability Studies** Gary L. Albrecht, Katherine D. Seelman, Michael Bury, 2001 This path breaking international handbook of disability studies signals the emergence of a vital new area of scholarship social policy and activism Drawing on the insights of disability scholars around the world and the creative advice of an international editorial board the book engages the reader in the critical issues and debates framing disability studies and places them in an historical and cultural context Five years in the making this one volume summarizes the ongoing discourse ranging across continents and traditional academic disciplines To provide insight and perspective the volume is divided into three sections The shaping of disability studies as a field experiencing disability and disability in context Each section written by world class figures consists of original chapters designed to map the field and explore the key conceptual theoretical methodological practice and policy issues that constitute the field Each chapter provides a critical review of an area positions and literature

and an agenda for future research and practice The handbook answers the need expressed by the disability community for a thought provoking interdisciplinary international examination of the vibrant field of disability studies The book will be of interest to disabled people scholars policy makers and activists alike The book aims to define the existing field stimulate future debate encourage respectful discourse between different interest groups and move the field a step forward

**Journal of Disability Policy Studies** ,2005 Developing a Comprehensive Health Services Research Capacity in Physical Disability and Rehabilitation ,1991 Disability, Human Rights and Education Felicity Armstrong,Len Barton,1999 This volume recognizes the importance of an informed cross cultural understanding of the policies and practices of different societies within the field of disability human rights and education It represents an attempt to critically engage with issues arising from the historical and contemporary domination of portrayals of the western as advanced democratic and exemplary in contrast to the construction of the rest of the world as backward primitive and inferior in these fundamental areas How human rights are understood in different contexts is a key theme in this book Some contributors raise questions about the value of a human rights model across all societies Others see the struggle for human rights as at the heart of the struggle for an inclusive society The implications for education arising from this debate are identified and a series of questions are raised by each author for further reflection and discussion as well as providing a stimulus for developing future research

**Exploring Theories and Expanding Methodologies** Sharon N. Barnartt,Barbara Altman,2001 Focuses attention on the dual themes of theory and methodology that must form a basis for studies of impairment and disability This work addresses issues that include critiques of current concepts of disability the fit between sociological role theory and the concept of disability and the operationalization of many definitions of disability **Disability Research and Policy** Richard J. Morris,2006-04-21 Scholars working on a research project at the University of Arizona look at some relatively new areas of research and scholarship concerning adults and children within the area of disability and critically examine various public policy and legal issues that impact the daily lives of many people having disabilities Among their topics are the use of

Disability Studies Today Colin Barnes,Len Barton,Mike Oliver,2002-12-13 Over recent years there has been an unprecedented upsurge of interest in the general area of disability and disability studies amongst academics and researchers throughout the world This has generated an increasingly expansive literature from a variety of perspectives including cultural studies development studies geography history philosophy social policy social psychology and sociology Perhaps inevitably given this heightened interest a number of important challenges and debates have emerged which raise many significant questions for all those interested in this newly emergent and increasingly important field Disability Studies Today provides an invaluable introduction to and an overview of these concerns and controversies Although the field is increasingly interdisciplinary in nature the emphasis is primarily a sociological one since sociology continues to play a central role in the development of disability studies Whilst the focus is primarily on theoretical innovation and advancement the arguments

presented in this book have important political and policy implications for both disabled and non disabled people Moreover since disability studies like ethnic women s and gay and lesbian studies has developed from a position of engagement and activism rather than one of detachment the articles in this volume maintain this tradition The book contains contributions from established figures as well as newcomers to the field Topics covered include the history of the development of disability studies in Britain and America key ideas issues and thinkers the role of the body divisions and hierarchies history power and identity work politics and the disabled peoples movement globalization human rights research and the role of the academy This book will prove invaluable to scholars researchers students and policy makers and indeed all those involved in this increasingly important area of social enquiry
