Hardoy (historien.), 1992 The Latin American city today is neither a political center for imposing control over its region nor a commercial and industrial hub linking the countryside to an economic network It has according to Richard M Morse become a lodestone that draws people to itself willy nilly In the 1980s the poor especially became concentrated in urban areas where they often lived in degrading or unhealthy conditions were unemployed or underemployed and were vulnerable to constant interference from authorities *Rethinking the Latin American City* does not ask how academic disciplines and administrative devices may be applied to urban problems but instead admits that cities are out of control socially economically politically administratively and culturally and seeks new paths for adjusting scholarly discourse to the

realities of contemporary urban phenomena The very categories of study must be reformed according to Morse on the basis of intentions voices and forms of association that may arise from the people The book presents responses by seventeen experts from city management philosophy architecture history and law Many contributors have been municipal officials or national political officials others are teachers researchers and writers

**The Politics of Problem Definition** David A. Rochefort, Roger W. Cobb, 1994 At the nexus of politics and policy development lies persistent conflict over where problems come from what they signify and based on the answers to those questions what kinds of solutions should be sought Policy researchers call this process problem definition Written for both scholars and students this book explains how and why social issues come to be defined in different ways how these definitions are expressed in the world of politics and what consequences these definitions have for government action and agenda setting dynamics The authors demonstrate in two theoretical chapters and seven provocative case studies how problem definition affects policymaking for high profile social issues like AIDS drugs and sexual harassment as well as for problems like traffic congestion plant closings agricultural tax benefits and air transportation By examining the way social problems are framed for political discussion the authors illuminate the unique impact of beliefs values ideas and language on the public policymaking process and its outcomes In so doing they establish a common vocabulary for the study of problem definition review and critique the insights of existing work on the topic and identify directions for future research
