[The Rape of the Mind](#) Joost Meerloo,2023-03-25 *The Rape of the Mind* represents one of the earliest and most notable studies of social control political conformity and menticide Dutch physician and psychoanalyst Joost Meerloo one of six children but the only one to escape the Holocaust had experienced firsthand the myriad of thought control tactics employed by totalitarian states when he wrote *The Rape of the Mind* in 1956 In these pages Meerloo undertakes a systematic analysis of methods for brainwashing and control exploring such subjects as coercion mass delusion false trials mental contagion semantic fog the use of fear and other techniques for mass submission among much else Many of Meerloo s predictions were ratified throughout the Cold War and his ideas continue to take on new light in the hyper novel technology and media driven world of today

***The Rape of the Mind: The Psychology of Thought Control, Menticide, and Brainwashing*** Dr. Joost A. M. Meerloo,2015-11-06 SINCE 1933 when a completely drugged and trial conditioned human wreck confessed to having started the Reichstag fire in Berlin Dr Joost A M Meerloo has studied the methods by which systematic mental pressure brings people to abject submission and by which totalitarians imprint their subjective truth on their victims minds The first two and one half years of WWII Dr Meerloo spent under the pressure of Nazi occupied Holland witnessing at first hand the Nazi methods of mental torture on more than one occasion Then after personal experiences with enforced interrogation he escaped from a Nazi prison and certain death to England where he was able as Chief of the Psychological Department of the Netherlands Forces to observe and study coercive methods officially After the war he came to the United States As more and more cases of thought control brainwashing and mental coercion were disclosed Cardinal

*Summary of Joost A.M. Meerloo's The Rape Of The Mind* Everest Media,2022-03-04T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The human mind is susceptible to political coercion In 1933 the German Reichstag building was burned to the ground and the Nazis arrested a Dutchman Marinus Van der Lubbe and accused him of the crime Van der Lubbe was known by Dutch psychiatrists to be mentally unstable 2 The trial of van der Lubbe showed the world the danger of systematized mental coercion in politics The world began to realize that the Bolsheviks had turned their old comrades into puppets and that they were being systematically changed into sheep 3 During the Second World War the Nazis forced confessions out of prisoners and those who were resistant or did not comply were subject to further torture We learned from this experience and decided that it was better not to be in touch with one another in order to avoid being betrayed 4 The Nazis used a variety of psychological strategies to break their prisoners from torture to playing the coward to confessing too much I had to flee Holland after a policeman warned me that my name had been mentioned in an interrogation

**The Mind Is a Collection** Sean Silver,2015-10-28 John Locke described the mind as a cabinet Robert Hooke called it a repository Joseph Addison imagined a drawer of medals Each of these philosophers was an avid collector and curator of books coins and cultural artifacts It is therefore no coincidence that when they wrote about the mental work of reason and imagination they modeled their powers of intellect in terms of collecting cataloging and classification *The Mind Is a Collection* approaches seventeenth and eighteenth century metaphors of the mind from a material point of view Each of the book s six chapters is organized as a

series of linked exhibits that speak to a single aspect of Enlightenment philosophies of mind From his first chapter on metaphor to the last one on dispossession Sean Silver looks at ways that abstract theories referred to cognitive ecologies systems crafted to enable certain kinds of thinking such as libraries workshops notebooks collections and gardens In doing so he demonstrates the crossings over of material into ideal ideal into material and the ways in which an idea might repeatedly turn up in an object or a range of objects might repeatedly stand for an idea A brief conclusion examines the afterlife of the metaphor of mind as collection as it turns up in present day cognitive studies Modern cognitive theory has been applied to the microcomputer and while the object is new the habit is as old as the Enlightenment By examining lived environments and embodied habits from 1660 to 1800 Silver demonstrates that the philosophical dualism that separated mind from body and idea from thing was inextricably established through active engagement with crafted ecologies
