Affect, Alienation, and Politics in Therapeutic Culture Suvi Salmenniemi, 2022-08-12 This book contributes to research on therapeutic culture by drawing on longstanding ethnographic work and by offering a new theoretical reading of therapeutic culture in today's society It suggests that the therapeutic field serves as a key site in which a number of contradictions of capitalism are confronted and lived out It shows that therapeutic engagements are inherently ambivalent and contradictory as they can be articulated and engaged with in many different ways and harnessed for diverse and often contradictory political projects The book takes issue with the interpretation of therapeutic culture as merely individualising depoliticizing and working in congruence with neoliberalism and shows that therapeutic engagements may also open up a space for contestation and critique of neoliberal capitalism animate collective action for social change and articulate alternative forms of life and subjectivities The book will speak to a wide variety of audiences in the social sciences and will be of particular interest to those working in the fields of sociology anthropology critical psychology cultural studies gender studies and critical social theory

Handcuffed Malcolm K. Sparrow, 2016-04-26 Whatever happened to community and problem oriented policing How the current crisis in policing can be traced to failures of reform The police shooting of an unarmed young black man in the St Louis suburb of Ferguson Missouri in August 2014 sparked riots and the beginning of a national conversation on race and policing Much of the ensuing discussion has focused on the persistence of racial disparities and the extraordinarily high rate at which American police kill civilians an average of roughly three per day Malcolm Sparrow who teaches at Harvard s Kennedy School and is a former British police detective argues that other factors in the development of police theory and practice over the last twenty five years have also played a major role in contributing to these tragedies and to a great many other cases involving excessive police force and community alienation Sparrow shows how the core ideas of community and problem solving policing have failed to thrive In many police departments these foundational ideas have been reduced to mere rhetoric The result is heavy reliance on narrow quantitative metrics where police define how well they are doing by tallying up traffic tickets issued Ferguson or arrests made for petty crimes in New York Sparrow s analysis shows what it will take for police departments to escape their narrow focus and perverse metrics and turn back to making public safety and public cooperation their primary goals Police according to Sparrow are in the risk control business and need to grasp the fundamental nature of that challenge and develop a much more sophisticated understanding of its implications for mission methods measurement partnerships and analysis

Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation s leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future **Imperatives and Their Logics** Nicholas J.
