Organization In Vision:

Organization in Vision Gaetano Kanizsa, 1979 **Perceptual Organization in Vision** Ruth Kimchi, Marlene Behrmann, Carl R. Olson, 2003 Understanding visual perceptual organization remains a challenge for vision science. *Perceptual Organization in Vision: Behavioral and Neural Perspectives* explores ideas emanating from behavioral, developmental, neuropsychological, neurophysiological, and computational approaches to the problem of perceptual organization. The growing body of research on perceptual organization has converged on a number of critical issues, most of which are addressed in this volume. These include issues concerning the nature and order of organizational processes, the stimulus factors that engage the mechanisms of organization, the developmental stage at which the mechanisms of organization are available, the role of past experience and learning in organization, the neural mechanisms underlying perceptual organization, and the relations between perceptual organization and other cognitive processes in particular object recognition and visual attention. Divided into four parts, the book is designed not only to detail the current state of the art in the field but also to promote an interdisciplinary approach to the study of perceptual organization. Part I presents an overview of the problem of perceptual organization, different frameworks for understanding perceptual organization, and a state-of-the-art summary of the domain. Part II details which organizational processes are hardwired in the perceptual system, which are acquired through experience, and how object perception relates to other aspects of cognition. Part III describes various attempts to understand the neural mechanisms underlying perceptual organization using two different approaches: neurophysiological and neuropsychological. Part IV offers a computational approach to the problem. This book is intended for cognitive psychologists, neuroscientists, computational vision scientists, and developmental psychologists.

The Secret Sauce of Servant Leadership Dr. Peter K. Scheuermann, 2023-02-10 *The Secret Sauce of Servant Leadership* was borne out of the desire to help others quickly ignite and launch servant leadership characteristics and attributes into a leader's style and approach to influencing and leading people, not employees. This book applies to all industries and cultures across the globe. The book is structured by first defining a leadership concept, then learning about examples of modern-day leaders and organizations who display and live out servant leadership characteristics in their approach, and then how this can be applied in other organizations. The author takes time in covering such topics as what is servant leadership, defining one's purpose, living out one's values, building a high-performance culture, creating trust, and sustaining long-lasting relationships, developing and sustaining a servant leader's character, and finally, the most important of all, love—the love of people. The last two chapters provide a 360-degree servant leadership assessment example and how servant leadership can be integrated and applied in workplace leadership programs. The hope of the author is that the reader will quickly gain an understanding of servant leadership characteristics, achieve insights into the examples of both individuals and organizations provided, and then immediately start incorporating these principles within their leadership approach, in turn helping others to become servant

Coming in from the Margins Connie Schroeder, 2023-07-03 Why is it critical for faculty development centers to reexamine their core mission today The core argument of this book that a necessary and significant role change is underway in faculty development is a call for centers to merge the traditional responsibilities and services of the past several decades with a leadership role as organizational developers Failing collectively to define and outline the

dimensions and expertise of this new role puts centers at risk of not only marginalization but of dissolution. When a TLC is busy and in demand it is hard to believe that it may be despite all the activity and palpable array of daily outcomes institutionally marginalized. The actual and increasing potential of marginalization and center closings may help motivate this field to recognize the danger of complacency or remaining stuck in an old paradigm that exclusively defines itself as instructional development or supportive service. Proposing a newly defined organizational development role for academic and faculty developers and directors of teaching and learning centers. Coming in from the Margins examines how significant involvement in broader institutional change initiatives is becoming a critical aspect of this work. Although undefined and unrecognized as a significant dimension of this work the organizational development role increasingly demanded of developers is far more attuned with the demand for change facing higher education than ever before. The book provides evidence based research into what directors of centers are currently doing as organizational developers and how they shape influence and plan institutional initiatives that intersect with teaching and learning. Directors of centers their supervisors and leaders in the field provide models from a wide range of institutional contexts as well as the strategies they have employed to successfully engage in significant organizational development. They also demonstrate how they handled the challenges that ensued. The strategies in each chapter provide a practical resource and guide for re-examining the mission and structure of existing centers or for designing new centers of teaching and learning and most importantly to develop their role as change agents. The book covers such topics as Center mission statements Center staffing Center advisory boards committee involvement unique expertise knowledge and skills embedding Centers in strategic planning Center vision organizational change processes collaboration and partnerships institutional priorities and initiatives relationships with upper administration.
