Managing Disaster

Managing Disaster:

Managing Disaster Louise Kloos Comfort, 1988 This book reflects an important shift in society's definition of disaster. For centuries catastrophic events have been considered acts of God and therefore uncontrollable by definition. Managing Disaster is international in scope covering such natural and man-made calamities as tornadoes in western Pennsylvania, earthquakes in Peru, flooding in the Netherlands, and toxic waste disasters. Centers for hazard studies have only recently examined the interrelated aspects of disastrous events and recognized the interaction between natural hazards and human systems. As society attempts to acquire the information and develop the skills to reduce the risks and damage from disaster, an increasingly professional public service is reconsidering its strategies and policy direction. Managing Disaster addresses this problem and the need for a new approach to teaching this subject at the university level. Twenty-three professionals and scholars in public policy and administration from universities, government, and the private sector examine the basic issues confronting managers and public agencies in the face of disaster.

Approaches to Managing Disaster John Tiefenbacher, 2012-03-14 Approaches to Managing Disaster: Assessing Hazards, Emergencies, and Disaster Impacts demonstrates the array of information that is critical for improving disaster management. The book reflects major management components of the disaster continuum: the nature of risk, hazard, vulnerability, planning, response, and adaptation in the context of threats that derive from both nature and technology. The chapters include a selection of original research reports by an array of international scholars focused either on specific locations or on specific events. The chapters are ordered according to the phases of emergencies and disasters. The text reflects the disciplinary diversity found within disaster management and the challenges presented by the co-mingling of science and social science in their collective efforts to promote improvements in the techniques, approaches, and decision making by emergency response practitioners and the public. This text demonstrates the growing complexity of disasters and their management as well as the tests societies face every day.

Managing Disaster Risk in Emerging Economies Alcira Kreimer, Margaret Arnold, 2000-01-01 In 1999 natural catastrophes and man-made disasters claimed more than 105,000 lives, 95 percent of them in the developing world and caused economic losses of around US 100 billion. In 1998 the twin disasters of the Yangtze and Hurricane Mitch accounted for two-thirds of the US 65 billion loss. The geographical areas affected may vary, but one constant is that the per capita burden of catastrophic losses is dramatically higher in developing countries. To respond to an increased demand to assist disaster recovery programmes, the World Bank set up the Disaster Management Facility in 1998 to help provide the Bank with a more rapid and strategic response to disaster emergencies. The DMF focuses on risk identification, risk reduction, and risk sharing, transfer, the three major topics in this volume. The DMF also promotes strategic alliances with key private government, multilateral, and nongovernmental organisations to ensure the inclusion of disaster risk reduction as a central value of development. The most important of these partnerships is the ProVentio Consortium, launched in February 2000.

based on the premise that we must all take responsibility for making the new millennium a safer one Managing Disaster Risks to Cultural Heritage Bijan Rouhani, Xavier Romão, 2023-11-15 Managing Disaster Risks to Cultural Heritage presents case studies from different regions in the world and establishes a framework for understanding identifying and analysing disaster risks to immovable cultural heritage Featuring contributions from academics and practitioners from around the globe the book presents a comprehensive view of the scholarship relating to cultural heritage disaster risk preparedness and post disaster recovery Particular attention is given to the complex and dynamic nature of disaster risks and how they evolve during different phases of a catastrophic event especially as hazards can create secondary effects that have greater impacts on cultural heritage infrastructure and economy Arguing that risk preparedness and mitigation have historically been secondary to reactive emergency and first aid response the book demonstrates that preparedness plans based on sound risk assessments can prevent hazards from becoming disasters Emphasising that the protection of cultural heritage through preparedness mitigation actions and risk adaptation measures especially for climate change can contribute to the resilience of societies the book highlights the vital role of communities in such activities Managing Disaster Risks to Cultural Heritage will be useful to students professionals and scholars studying and working with cultural heritage protection It will be of particular interest to those working in the fields of Cultural Heritage Archaeology Conservation and Preservation Sustainable Development and Disaster Studies **Managing disaster risks for World Heritage**

Dealing with Disaster Sandra K. Schneider, 2011-08-30 Why does government sometimes do a superlative job handling

natural disaster situations while at other times as in the case of Hurricane Katrina it performs extremely poorly Updated with examples through 2010 this classic study examines the disruptive effects of disasters on patterns of human behavior and the routine operations of government and the conditions under which even relatively minor crises can lead to system breakdown Integrating case studies of emergency management with studies of collective behavior the author identifies factors that contribute to successful government handling of disaster situations and distills insights that can be used to improve these capacities at all levels federal state and local The book includes numerous illustrations as well as expanded coverage of research on disaster management and greatly expanded reference lists Emergency Management Thomas E.

Drabek, Gerard J. Hoetmer, 1991 *Global Assessment Report on Disaster Risk Reduction 2013* United Nations, 2013 This publication is the third biennial report coordinated by the United Nations Office for Disaster Risk Reduction UNISDR The first and second reports focused primarily on public policy and the role of national and local governments in disaster risk reduction This current report explores why increasing disaster risks represent a growing problem for the economic and business community at different scales It examines how paradoxically business investments that aimed to strengthen competitiveness and productivity may have inadvertently contributed to increasing risks This report seeks to engage businesses in a dialogue on disaster risk management that goes beyond the current emphasis on response and preparedness and instead identifies opportunities for the creation of shared value for business and society **White Paper on Disaster Management**, 1999 **Planning for Crisis Relief: Planning ... from natural disasters in metropolis**, 1988
