Microfinance Malcolm Harper, 2003 Microfinance Through Self Help Group (Shg) Bank Linkage Programme An Impact Assessment Veenapani, *The Crises of Microcredit* Isabelle Guérin, Marc Labie, Jean-Michel Servet, 2015-10-15

Microcredit programmes long considered efficient development tools now face unprecedented crises in a number of countries Is this the end of microcredit or rather an essential step in its expansion Should we stop microcredit altogether or rethink the way it is implemented Drawing on extensive empirical research conducted in various parts of the world from Morocco to Senegal to India this important volume examines the whole chain of microcredit to provide the answers to these questions In doing so the authors highlight the diversity of crises both in intensity and in nature while also shedding light on a diversity of causes be it microcredit organizations unprepared for massive growth saturated local economies or greedy investors and shareholders attracted by profits Crucially the authors demonstrate that microcredit is not a monolithic project and the crises should also be analysed in the light of national histories and policies An original and necessary intervention in what has become one of the most contentious topics within the development world Microfinance Rohit N. Desai, 2014

American Book Publishing Record , 2003 **Abstracts of Public Administration, Development, and Environment** , 2003 Economic Issues in Cameroon Vol.1 Benjamin Yamb , 2019-12-15

Ch 1 In a situation of bank credit rationing SMEs have the most recourse to short term financing In order of preference these include tontines microfinance institutions business to business loans carers friends helpers current associate competitions leasing institutions associations and associations increase in capital This order corresponds almost to the most sought after alternative financing methods There is therefore a financial equilibrium problem when it comes to meeting the long term and medium term needs of SMEs To respond to this concern we have proposed alternative financing methods to SMEs specifying their order of preference which SMEs can use in rationing bank credit Other proposals for banks and public authorities have also been made to improve bank financing for SMEs

Ch 2 Cocoa activity in Meme Division for decades has greatly contributed in the organisation of rural population as well as landscape in the area This is remarkable in the distribution patterns of local labour forces on cocoa farms after post colonial era In similar way it has also influence the social economic and political characteristics of local development in Meme Division since independence Despite many opportunities from the activity the sector remains questionable The chapter examines and analyses the contribution of cocoa production to local development in Meme Division as well as the nature of labour practices in the sector A random sampling technique of one hundred and fifty 150 cocoa producing households in thirty villages was adopted The issues raised by the respondents was statistically analysed after investigation Results show that cocoa production is one of the sources of national and households income It has also accounted for the development of solidarity farm working groups From which four labour patterns are created family hired force and voluntary labours These solidarity groups are mostly youth representing 60% of labour force as against 40% for

adults workers on cocoa activities Conclusion shows that Meme Division is the best sample to evaluate the role of cocoa activity in the organisation of local population labour distribution pattern on cocoa sector as well as local development Ch 3 The author attempts to use the Mookherjee and P ng model to analyse corruption as an important explanatory variable of the sustainable management crisis of the forest in Cameroon The analysis of fieldwork date indicates that the government of Cameroon does not have incisive and dissuasive instruments advocated in the latter model to eradicate corruption The author therefore encourages the government to utilise these instruments to attempt to reduce the above crisis Ch 4 This chapter describes from an observation of five cases of local markets in Africa how informal organizations are being formed and perpetuated It appears that the stability and sustainability of a given informal organization are determined by some factors apart from profitability or the comfort of a professional situation The implementation process and the informal coordination guarantee the stabilizing dynamics in how these markets operate Ch 5 This chapter attempts to assess the extent of the phenomenon then to discuss the relevant explanatory variables and finally to examine the efforts of the fight against corruption A tentative conclusion is that the failure of the fight against the phenomenon is explained by the fact that the variables that best explain the phenomenon in the implementation of control strategies are not taken into account In particular the analysis indicates that an adapted control policy should be based on salary increases and the strengthening of control and sanction policies Ch 6 The microfinance a financial inclusion factor does not seem to effectively play its role of a bank for the poor in Cameroon The success story of the Grameen Bank s microfinance model leads to draw some lessons for the Cameroonian financial system From this model of successful microfinance conceived by Mohammad Yunusin Bangladesh in the 1970 s we have conducted a comparative study of the practice of microfinance within the Grameen Bank context and Cameroon From it there are some principal lessons which show how micro credit supply to the poor can be improved in Cameroon Ch 7 Work in a simplistic way is considered as an activity allowing an individual to receive a remuneration that can allow the latter to support oneself However during the European occupation in Kamerun a distinction can be made between employees who worked in plantations of cash crops which were poorly remunerated And administrative employees beside them there were also mission s non employees that worked for nothing according to the will of God This was therefore valid wherever Europeans and Christianity were passing Today International Labour Organization has redefined working conditions on a redevelopment that will enable people to live on the fruits of their labour even if the notion of surplus value persists
