

# Introduction

The purpose of this presentation is to describe step by step the transition of a SAS Programmer into a Clinical Statistical Programmer. It can be used as guidelines for SAS Programmers who wants to put their programming and technical expertise into industries.

A SAS Programmer is someone who uses SAS software for different scenarios. The person who uses it for different purposes is known as a SAS Programmer.

On the other hand, a Clinical Statistical Programmer performs all the procedures to generate future outputs and makes advanced and real-world developments to face further challenges. A primary role of Clinical Statistical Programmers is to use their technical and programming skills in order to enable clinical trial statisticians to perform their statistical analysis duties more efficiently.

This presentation will briefly discuss about the smooth transition that a SAS Programmer needs to go through in order to become a Clinical Statistical Programmer.
