Programmed Review Of Engineering Fundamentals:

A Programmed Review Of Engineering Fundamentals Baldwin,Hess,2013-04-17 Engineering registration is accelerating at a pace unequalled since institution of registration laws in the 1920s and 1930s This phenomenon is not due to an easing of entrance requirements since only vestiges of grand fathering and eminence exist in most states Nor is it due to a lessening in the difficulty of the registration examinations In fact it is generally agreed that the Engineering Fundamentals Examination has significantly increased in difficulty over the last fifteen years Why then the increased interest in registration among practicing engineers Historically the professional engineer has been in private practice offering consulting services directly to the public Registration laws were passed to protect the public from incompetent untrained practitioners in any engineering area However the registration laws go beyond establishing an individual's credentials One reason for the new interest in engineering registration is the proliferation of new activity areas such as pollution control and energy conservation where the public is keenly aware of and insistent upon quality technological inputs *A Programmed Review for Electrical Engineering* James H. Bentley,2012-12-06 The field of electrical engineering is very innovative new products and new ideas are continually being developed Yet all these innovations are based on the fundamental principles of electrical engineering Ohm's law Kirchhoff's laws feedback control waveforms capacitance resistance inductance electricity magnetism current voltage power energy It is these basic fundamentals which are tested for in the Professional Engineering Examination PE Exam This text provides an organized review of the basic electrical engineering fundamentals It is an outgrowth of an electrical engineering refresher course taught by the author to candidates preparing for the Professional Engineering Examination a course which has enabled scores of electrical engineers in Minnesota and Wisconsin to successfully pass the PE Exam The material is representative of the type of questions appearing in the PE Exams prepared by the National Council of Engineering Examiners NCEE over the past twelve years Each problem in the text has been carefully selected to illustrate a specific concept Included with each problem is at least one solution Although the solutions have been carefully checked both by the author and by students there may be differences of interpretation Also in some cases certain assumptions may need to be made prior to problem solution and since these to individual the final answer may also differ The assumptions will vary from individual author has attempted to keep the requirements for assumptions and interpretation to a minimum **Professional Engineer**,1985 **Standard Handbook of Consulting Engineering Practice** Tyler Gregory Hicks,Jerome F.
