Corpus, Cognition and Causative Constructions Gaëtanelle Gilquin,2010 English causative constructions with cause get have and make are often mistakenly presented as quasi synonymous and more or less interchangeable This book demonstrates the value of corpus linguistics in identifying the syntactic semantic lexical and stylistic features that are distinctive for each of these constructions It also underlines the usefulness of providing corpus studies with a solid theoretical foundation by showing how corpus linguistics can be fruitfully combined with cognitive linguistics which is used both as a starting point for the analysis top down approach and as a framework within which to interpret the corpus results bottom up approach From a methodological point of view the study illustrates the complementarity of corpus and elicitation data and offers tools and methods that could be used to investigate other syntactic structures Finally the book also has a pedagogical dimension in that it examines how the research findings can be applied to foreign language teaching **Books in Print Supplement** ,2002 **Programming for Corpus Linguistics** Oliver Mason,2000 The ability to program a

computer has become increasingly important in work that involves corpora Specialised research needs can no longer be met by available software and purchasing customised programs is usually not an option This book enables the researcher to write programs for text and corpus processing Useful techniques are illustrated with the popular programming language Java which is very well suited for handling textual data and at the same time easy to learn Features a general introduction to programming for readers with a linguistic background a practical introduction to corpus linguistics for readers with a programming background who are new to corpus processing a guide to relevant aspects of Java which will be useful for text processing a variety of sample programs which are in themselves useful tools for corpus research
