Reading Humanitarian Intervention:

Reading Humanitarian Intervention Anne Orford, 2003-06-26 During the 1990s humanitarian intervention seemed to promise a world in which democracy self determination and human rights would be privileged over national interests or imperial ambitions Orford provides critical readings of the narratives that accompanied such interventions and shaped legal justifications for the use of force by the international community Through a close reading of legal texts and institutional practice she argues that a far more circumscribed exploitative and conservative interpretation of the ends of intervention was adopted during this period The book draws on a wide range of sources including critical legal theory feminist and postcolonial theory psychoanalytic theory and critical geography to develop ways of reading directed at thinking through the cultural and economic effects of militarized humanitarianism The book concludes by asking what if anything has been lost in the move from the era of humanitarian intervention to an international relations dominated by wars on terror **The**

Current Status of Humanitarian Intervention in Need of Legal Clarification. Analysis of the Legal and

Humanitarian Justifications for Intervening In Libya and the Inaction in Syria Yewande Abiodun, 2020-06-24 Master s Thesis from the year 2014 in the subject Law European and International Law Intellectual Properties grade DISTINCTION University of Hertfordshire Faculty of Law course International Law language English abstract In this thesis the concepts of Sovereignty non intervention and Humanitarian Intervention will gradually be unveiled especially in subsequent chapters The cases of Syria and Libya will serve as watershed for the theoretically unveiled concepts The principle of State Sovereignty plays a great role in the formation of international law as it sets a basic foundation on which the international society is built The natural supposition is that international order is best maintained if states respect one another s sovereignty by adhering to the norms of non intervention in the internal affairs of other states The modern idea of Sovereignty dates back to Ancient Rome in which all sovereign powers were bestowed on the Emperor It was deemed an absolute unified inalienable power based upon a voluntary but irrevocable contract Humanitarian Disarmament Treasa Dunworth, 2020-08-06 Humanitarian disarmament is not new but instead represents a re emergence of a long standing sensibility in disarmament discourse

Men, Militarism, and UN Peacekeeping Sandra Whitworth, 2004 In this important controversial and at times troubling book Sandra Whitworth looks behind the rhetoric to investigate from a feminist perspective some of the realities of military intervention under the UN flag Whitworth contends that there is a fundamental contradiction between portrayals of peacekeeping as altruistic and benign and the militarized masculinity that underpins the group identity of soldiers Examining evidence from Cambodia and Somalia she argues that sexual and other crimes can be seen as expressions of a violent hypermasculinity that is congruent with militarized identities but entirely incongruent with missions aimed at maintaining peace She also asserts that recent efforts within the UN to address gender issues in peacekeeping operations have failed because they fail to challenge traditional understandings of militaries conflict and women This unsettling critique of UN

operations which also investigates the interplay between gender and racial stereotyping in peacekeeping has the power to change conventional perceptions with considerable policy implications Diplomatic Interventions K. Fierke, 2005-04-22 Diplomatic Interventions argues that war is a social construction In so doing it unsettles the definition of intervention as a coercive interference by one state in the affairs of another to examine the range of communicative or diplomatic practices which through their presence modify the experience of war The tension between claims that war is pervasive and that war is a social construct is analysed in relation to a range of moral legal military economic cultural and therapeutic interventions The concluding chapter highlights how the book itself is a critical intervention that requires us look at again from a new angle at international practice Empire's Law Amy Bartholomew, 2006-03-20 Can democracy and human rights really be imposed by fire and sword This is a collection of essays debating empire and international law concerning the relationship between American imperialism the abuse of humanitarian intervention and its legal implications Covering everything from the role of Europe and the UN to people s tribunals to broader accounts of the contradictions of war and human rights the contributors offer new and innovative ways of examining the problems that we face Contributors include Leo Panitch Sam Gindin Jurgen Habermas Ulrich Preuss Andrew Arato Samir Amin Reg Whitaker Denis Halliday and Hans von Sponeck

Culture and International Law Hikmahanto Juwana, Jeffrey Thomas, Mohd Hazmi Mohd Rusli, Dhiana Puspitawati, 2019-09-03 In this era of globalization International Law plays a significant role in facing rapid development of various legal issues Cultural preservation has emerged as an important legal issue that should be considered by States This book consists of academic papers presented and discussed during the 9th International Conference of the Centre of International Law Studies 9th CILS Conference held in Malang Indonesia 2 3 October 2018 The title of the book represents the major theme of the conference Culture and International Law It is argued that along with globalization cultural preservation is slowly ignored by States Various papers presented in the book cover five topics cultural heritage cultural rights culture and economic activity culture and armed conflict and a general topic The authors of the papers are outstanding academics from various countries Lithuania United States of America Australia Thailand and Indonesia The conference was organized by Universitas Indonesia in collaboration with Brawijaya University This book aims to give a useful contribution to the existing literature on International Law specifically focussing on cultural issues from the perspective of cultural heritage and rights economic as well as armed conflict **Serious Violations of Human Rights** Ilia Siatitsa, 2022-05-12 This book analyses the use of the expression serious violations of human rights and similar ones such as gross or grave in international practice It highlights some of the recurring responses and consequences to such violations and suggests that a new special regime eponymous to the above mentioned expression was formed This special regime is understood as substantively limited to a very specific issue area of human rights violations Within this regime a series of monitoring mechanisms and procedures are in place to highlight document and record such violations specific measures are taken to enforce compliance and certain

consequences arise focused on remedying the victims of such violations As such this special regime is comprised of at least four thinly interconnected components the substantive the monitoring the enforcement and the remedial ones This monograph constitutes a first step towards the recognition of such a regime allowing far more constructive and coherent elaboration in the future Practice around this category of violations may well evolve in a different direction than the one suggested here However what becomes apparent from this work is that the serious violations of human rights are a key notion in the international legal order as it allows the international community to depict those factual situations requiring its attention and action

New Critical Legal Thinking Matthew Stone, Illan Wall, Costas Douzinas, 2012-10-12 New Critical Legal Thinking articulates the emergence of a stream of critical legal theory which is directly concerned with the relation between law and the political The early critical legal studies claim that all law is politics is displaced with a different and more nuanced theoretical arsenal Combining grand theory with a concern for grounded political interventions the various contributors to this book draw on political theorists and continental philosophers in order to engage with current legal problematics such as the recent global economic crisis the Arab spring and the emergence of biopolitics The contributions instantiate the claim that a new and radical political legal scholarship has come into being one which critically interrogates and intervenes in the contemporary relationship between law and power

Transformative Pacifism Andrew Fiala, 2018-08-23 Defending pacifism against the charge that it is na vely utopian Transformative Pacifism offers a critical theory of the existing world order and points in the direction of concrete ethical and political action Pacifism is a transformative philosophy with wide ranging implications It aims to transform political social and psychological structures Its focus is deep and wide It is similar to other transformative social theories feminism ecology animal welfare cosmopolitanism human rights theory Indeed behind those theories is often the pacifist idea that violence power and domination are wrong Pacifist theory raises consciousness about unjustifiable violence This in turn leads to transformations in practical life Many other books defend nonviolence and pacifism by focusing on failed justifications of war as well as on the strategic value of nonviolence This book begins by reviewing and accepting those sort of arguments It then focuses on what a commitment to pacifism and nonviolence means in terms of a variety of practical issues Pacifists reject the violent presuppositions of a society based upon power strength nationalism and the system of militarized nation states Pacifism transforms psychological social political and economic life This book will be of interest to those who are disenchanted with ongoing violence violent rhetoric terrorism wars and the war industry It gives anyone with pacifist sympathies reassurance pacifists are not wrong to think that violence and war are immoral irrational and insane and that there is always an alternative

International Law and World Order Burns H. Weston, Richard A. Falk, Hilary Charlesworth, 2006 Weston Falk Charlesworth and Strauss's *International Law and World Order* is a problem-oriented coursebook that poses four clusters of world order problems that require students to identify and frame legal issues in factual context. It enables students to determine the relevance of information, organize relevant law and policy, test their analytical skills, develop a critical understanding of the possibilities of international law, explore the nature of international law and the structure of its processes, examine the relationship of international law and lawyers to the world order. The text focuses on the current work of the International Criminal Tribunals for the Former Yugoslavia and Rwanda. Comprises a series of hypothetical problems involving fictional countries in real world decision-making settings organized around themes that conveniently cluster the principal challenges to the current international legal system.

Perspectives on Power Heather M. Morgan, Jernej Letnar Čeranič, Lindsay Milligan, 2010 Although power can appear a vague term, the dichotomy between having and not having the desire to gain autonomy and the dire consequences of subjugation are three issues that resound across the arts and social sciences. In this book, postgraduate students from the constituent disciplines use the freedom of their positions as early career researchers to boldly explore power relations. From a legal perspective, papers are included geared towards human rights issues and violations. Further, the applied perspectives from business and education researchers consider how access to wealth and education and to equal education can and must be achieved. Then interpreted through the perspectives of anthropological, sociological, and historical approaches, power has become a resonant issue among the creations of culture and human interactions. Finally, within the soft sciences, the very same preoccupations as they appear in creative expression are examined within literature and music. Indeed, through the twenty-one articles chosen for inclusion in this collection, distinct in their disciplinary origins, approaches, and foci, together the authors are emphasizing the many similarities that exist among the arts and social sciences subjects.

Perspectives on Power: An Interdisciplinary Approach This volume was conceived as a result of the quality and reception of papers presented at the 2008 Moving Forward Postgraduate Conference held at the University of Aberdeen. The volume comprises twenty-one articles on the theme of power, carefully chosen by the editorial team from in excess of eighty presentations. These represent and tender a wide range of scholarly approaches to and within the arts and social sciences, the remit of Moving Forward. The collection is aimed at scholars and scholarly institutions within the United Kingdom in particular but contains contributions from scholars across the globe. The collection should especially appeal to and inspire delegates visiting the Moving Forward Postgraduate Conference in the years to come.

Human Rights and Humanitarian Intervention Elizabeth Bruch, 2016-05-12 Human rights, peacekeeping, and humanitarian intervention have emerged in the past decades as important components of international law and practice. Adopting a methodology of Institutional Ethnography informed by Actor Network Theory, this book traces the practices of law and expertise from global IGO headquarters to the field and back again.

and through various contemporary field missions from Bosnia to Afghanistan and East Timor to Sierra Leone It answers several fundamental questions How is human rights law engaged in establishing the peace rebuilding the nation and restoring the rule of law in post conflict situations How do human rights experts use law in their everyday work in the context of humanitarian intervention How are law and expertise established sustained and transformed in the field Offering a complex and nuanced explanation of humanitarian intervention based upon a multi dimensional understanding of law and power this book will be of interest and use to scholars students and practitioners in international law and policy human rights and humanitarian intervention Its cross disciplinary approach should also appeal to the professional communities engaged directly and indirectly with projects of humanitarian intervention including staff at inter governmental organizations international lawyers and practitioners and activists
