1.1 Meaning of Research: Definition, Objectives, Characteristics

Meaning and Definition

Research:

The term research consists of two words, 're'+ 'search'. "re" means again and again and "search" means to find out something.

Research is the systematic and organized effort to investigate a specific problem that needs a solution. It contributes to the general body of knowledge. It also corrects human knowledge. Actually, research is simply the process of arriving at a dependable solution to a problem through the planned and systematic collection, analysis and interpretation of a data.

Research is the most important process for advancing knowledge for promoting progress and to enable man to relate more effectively to his environment to accomplish his purpose and to solve his conflicts. Although it is not the only way, it is one of the most effective ways of solving problems.

Definitions of Research:

- a) According to **Black and Champion**, "scientific research consists of obtaining information through empirical observation that can be used for systematic development of logically related propositions attempting to establish casual relations among variable".
- b) **Emory** defines research as "any organized inquiry designed and carried out to provide information for solving a problem".
- c) **Kerlinger** defines research as a "systematic, controlled, empirical and critical investigation of hypothetical relations among natural phenomena".
- d) **L.V. Redman and A.V.H. Morry** define research as "systematic effort to gain new knowledge".

1.2 Nature of Social Research: Meaning, Objectives, Characteristics.

Nature of Social research
