Engineers,1976      **Bibliography of Agriculture with Subject Index** ,1983-10      **Analysis of Energy Efficiency of Industrial Processes** Vladimir S. Stepanov,2012-12-06 It is universally recognized that the end of the current and the beginning of the next century will be characterized by a radical change in the existing trends in the economic development of all countries and a transition to new principles of economic management on the basis of a resource and energy conservation policy Thus there is an urgent necessity to study methods technical aids and economic consequences of this change and particularly to determine the possible amounts of energy resources which could be conserved energy reserves in different spheres of the national economy An increased interest towards energy conservation in industry one of the largest energy consumers is quite natural and is manifested by the large number of publications on this topic But the majority of publications are devoted to the solution of narrowly defined problems determination of energy reserves in specific processes and plants efficiency estimation of individual energy conservation measures etc However it is necessary to develop a general methodological approach to the solution of such problems and create a scientific and methodical base for realizing an energy conservation policy Such an effort is made in this book which is concerned with methods for studying energy use efficiency in technological processes and estimation of the theoretical and actual energy reserves in a given process technology or industrial sector on the basis of their complete energy balances      *Process Optimization Guide for Military Manufacturing and Maintenance Facilities* ,      The Management of Energy Conservation in the Chemical Process Industry Douglas John Leslie,1900      "Code of Massachusetts regulations, 2015" ,2015 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020
