Integration of Process Planning and Scheduling Rakesh Kumar Phanden,Ajai Jain,J. Paulo Davim,2019-10-16 Both process planning and scheduling are very important functions of manufacturing which affect together the cost to manufacture a product and the time to deliver it This book contains various approaches proposed by researchers to integrate the process planning and scheduling functions of manufacturing under varying configurations of shops It is useful for both beginners and advanced researchers to understand and formulate the Integration Process Planning and Scheduling IPPS problem effectively Features Covers the basics of both process planning and scheduling Presents nonlinear approaches closed loop approaches as well as distributed approaches Discuss the outfit of IPPS in Industry 4 0 paradigm Includes the benchmarking problems on IPPS Contains nature algorithms and metaheuristics for performance measurements in IPPS Presents analysis of energy efficient objective for sustainable manufacturing in IPPS Integrated Process Planning, Scheduling, and Due-Date Assignment Halil Ibrahim Demir,Abdullah Hulusi K k am,Caner Erden,2023-08-10 Traditionally the three most important manufacturing functions are process planning scheduling and due date assignment which are handled sequentially and separately This book integrates these manufacturing processes and functions to increase global performance along with manufacturing and production cost savings Integrated Process Planning Scheduling and Due Date Assignment combines the most important manufacturing functions to use manufacturing resources better reduce production costs and eliminate bottlenecks with increased production efficiency The book covers how the integration will help eliminate scheduling conflicts and how to adapt to irregular shop floor disturbances It also explains how other elements such as tardiness and earliness are penalized and how prioritizing helps improve weight performance function This book will draw the interest of professionals students and academicians in process planning scheduling and due date assignment It could also be supplemental material for manufacturing courses in industrial engineering and manufacturing engineering departments Healthcare Technology Management Systems Rossana Rivas,Luis Vilcahuam n,2017-07-17 Healthcare Technology Management Systems provides a model for implementing an effective healthcare technology management HTM system in hospitals and healthcare provider

settings as well as promoting a new analysis of hospital organization for decision making regarding technology. Despite healthcare complexity and challenges, current models of management and organization of technology in hospitals still have evolved over those established 40-50 years ago according to totally different circumstances and technologies available now. The current health context based on new technologies demands working with an updated model of management and organization which requires a re-engineering perspective to achieve appropriate levels of clinical effectiveness, efficiency, safety, and quality. Healthcare Technology Management Systems presents best practices for implementing procedures for effective technology management focused on human resources as well as aspects related to liability and the appropriate procedures for implementation. Presents a new model for hospital organization for Clinical Engineers and administrators to implement Healthcare Technology Management (HTM). Understand how to implement Healthcare Technology Management (HTM) and Health Technology Assessment (HTA) within all types of organizations including Human Resource impact Technology Policy and Regulations, Health Technology Planning (HTP) and Acquisition as well as Asset and Risk Management. Transfer of knowledge from applied research in CE, HTM, HTP, and HTA from award-winning authors who are active in international health organizations such as the World Health Organization (WHO), Pan American Health Organization (PAHO), American College of Clinical Engineering (ACCE), and International Federation for Medical and Biological Engineering (IFMBE).

Computer-aided Process Planning (CAPP) - Sorich Sohail Pirzada, 1991. The last two decades have witnessed the increasing role of the computer in the process planning function. This has been further enhanced by the advent of the knowledge-based expert system and its impact on Computer Aided Process Planning (CAPP). CAPP has emerged as a strategic link between design and manufacture. This thesis discusses the various methods used in the process planning function. Group Technology (GT) plays a pivotal role in establishing CAPP. The utilization of Artificial Intelligence techniques in CAPP is listed. This study also presents an Interactive Software adaptive to product part configuration variables. *Knowledge and Technology Integration in Production and Services* Vladimír Marík, Luis M.
