Proceedings and Addresses of the American Philosophical Association American Philosophical Association, 2007
List of members in v 1 [A Nietzschean Metaethics](#) David Emmanuel Rowe, 2019-10-17 This book develops a novel interpretation of the late nineteenth century German philosopher Friedrich Nietzsche as holding a distinct and original metaethical position a theory about our practice of ethics David Emmanuel Rowe characterizes it as a human centered metaethics A central achievement of A Nietzschean Metaethics is to bring Nietzsche into a conversation with the analytic metaethical tradition To do so Rowe interprets Nietzsche s use of such concepts as the notorious will to power his ideal agent the superman or bermensch nihilism the eternal recurrence Perspectivism and Being and Becoming The result is a view of Nietzsche as a radical moral error theorist which is to say he defends the view that all statements that appeal to some value for their truth are false This theory is radical because Nietzsche argues that insofar as language requires certain concepts for its truth it is in error in virtue of an appeal to some value Rowe also offers a view where the increase in one s power is a standard by which one can make sense of Nietzsche s so called re evaluation of all values By means of this resolution Nietzsche criticizes some contemporary themes in metaethics such as particular views about moral motivation reasons moral error theory and agency

Ornament and Order Dr Rafael Schacter, 2014-05-28 Based on an in depth ethnographic study working with some of the world s most influential Independent Public Artists this book takes a completely new approach Placing these illicit aesthetic practices within a broader historical political and aesthetic context it argues that they are in fact both intrinsically ornamental working within a classic architectonic framework as well as innately ordered within a highly ritualized performative structure Rather than disharmonic destructive forms rather than ones solely working within the dynamics of the market these insurgent images are seen to reface rather than deface the city operating within a modality of contemporary civic ritual *A Journal of Nigerian Languages and Culture* , 2008 **The Philosophical Review** Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 2006 An international journal of general philosophy *The Philosopher's Index* , 2008 Vols for 1969 include a section of abstracts **Reading Ethics** Miranda Fricker, Samuel Guttenplan, 2009 This introductory text encourages students to engage with key problems and arguments in ethics through a series of classic and contemporary readings It will inspire students to think about the distinctive nature of moral philosophy and to draw comparisons between different traditions of thought between ancient and modern philosophies and between theoretical and literary writing about the place of value in human life Each of the book s six chapters focuses on a particular theme the nature of goodness subjectivity and objectivity in ethical thinking justice and virtue moral motivation the place of moral obligation and the idea that literature can be a form of moral philosophy The historical readings come from Plato Aristotle Hume Kant and Mill and the contemporary readings from Foot Rawls McDowell Mackie Nagel Williams Nussbaum and Gaita The editors introductions to the themes and the interactive commentaries they provide for each reading

are intended to make Reading Ethics come as close as possible to a seminar in philosophy Philosophical Inquiry ,2008

A Theory of Literary Explication Kenneth B. Newell,2011-07-12 This book presents current multidisciplinary research and theory from 17 different fields most of them never before applied to literary explication in order to provide 1 justification for the practice of a relative probability type of explication as distinguished from interpretation 2 a relativistic foundation for the preference of some explication s of a literary work over others and thereby 3 a middle way between the postmodern pluralist view that a work has only an unlimited number of equally acceptable though different explications and the modern intentionalist view that it has only one acceptable explication the author s Nine of the 17 fields are of primary relevance critical theory hermeneutics probability theory philosophy of science second order logic and four fields of cognitive science linguistics epistemology neuropsychology and artificial intelligence But the book also touches upon textual criticism legal theory measure theory fuzzy logic animal learning behavior developmental psychology evolutionary epistemology and neurobiology The book shows that those using a relative probability type of explication on a literary work can achieve consensus because the healthy adult human brain has an evolved uniform and probably innate ability to form relative probability judgments and to form them in the practice of activities like reading and explicating that are not uniform and innate Lastly the book contributes to the scholarly areas of explication theory and practice first by providing a relativistic foundation for a craft explication that currently is not acknowledged to have any foundation but nonetheless continues and will continue to be practiced and second by presenting a means relative epistemic probability by which judging some explication s of a literary work to be more acceptable than others may be justified philosophically an uncommon circumstance in this postmodern era in which philosophical justification of many beliefs and practices is thought to be untenable *American Book Publishing Record* ,2006 **Bibliographic Index** ,2009 *Book Review Index* ,2006 Every 3rd issue is a quarterly cumulation The British National Bibliography Arthur James Wells,2009 *Reading Metaphysics* Helen Beebee,Julian Dodd,2007-01-05 This collection brings together key contemporary texts in metaphysics and features an interactive commentary which helps readers engage the texts critically and to use them to develop their own views Each text is followed by a detailed commentary setting it in context Includes questions designed to help readers think hard about what the author is saying and why to think of objections and to formulate his or her own views Aims to improve the reader s ability to engage critically with philosophical texts and to use them as a springboard for philosophical thought and writing Introduces readers to the perennial problems of metaphysics and the ways that different analytic philosophers have approached them *Linguistics and Language Behavior Abstracts* ,2009-04 *Library Journal* ,2008
