Policing: Toward an Unknown Future John Crank, Colleen Kadleck, 2013-12-16 The enclosed papers are the culmination of a project Dr John Crank and Dr Colleen Kadleck carried out assessing issues facing the police into the early 21st century The papers are future oriented in the sense that they anticipate trends visible today Everywhere the contributing scholars found that the organizational concept practice and function of the police were undergoing transition Yet the seeming state level hardening of the police function was ubiquitous Two themes were noteworthy On the one hand in developing or second world countries police face endemic problems of corruption organized crime and drugs Police in response are undergoing centralization and intensification of law enforcement activities In countries with first world economies Canada the United States and Australia contributors discovered trends toward expansion of the police function a trend described by Brodeur as toward high policing It reflects the growing reliance on surveillance for crime control and for the tracking of minority indigenous and immigrant populations in crime prevention efforts The results suggest that governments sometimes encouraged by their citizenry seem increasingly to rely on the police to deal with a broad array of social as well as criminal problems This book was originally published as a special issue of *Police Practice and Research* *Comparative Policing* Jacques de Maillard, 2022-09-08 This book is a systematic and comparative analysis of police systems in the Western world looking at their structure and how they tackle contemporary social problems such as economic austerity multi level governance transnational change relations with minorities and transformation of delinquency Core content includes Comparative histories of the formation of national police systems A discussion of centralised and decentralised police systems International differences in community policing A review of different police strategies in fighting delinquency and reducing urban disorder A comparative analysis of different ways of controlling police misconduct An exploration of different models of plural policing While other books focus on policing in relation to measures effective in decreasing delinquency and augmenting security this book considers the political professional administrative and political economic parameters which frame and shape the course of police reforms It also explores how operational policing is shaped by the cultural and institutional contexts in which it is located It is essential reading for students engaged in international police studies and comparative criminal justice **The SAGE Handbook of Global Policing** Ben Bradford, Beatrice Jauregui, Ian Loader, Jonny Steinberg, 2016-07-14 The SAGE Handbook of Global Policing examines and critically retraces the field of

policing studies by posing and exploring a series of fundamental questions to do with the concept and institutions of policing and their relation to social and political life in today's globalized world. Critical Systems Thinking and the Management of Complexity Michael C. Jackson, 2019-04-08. From the winner of the INCOSE Pioneer Award 2022, the world has become increasingly networked and unpredictable. Decision makers at all levels are required to manage the consequences of complexity every day. They must deal with problems that arise unexpectedly, generate uncertainty, are characterised by interconnectivity, and spread across traditional boundaries. Simple solutions to complex problems are usually inadequate and risk exacerbating the original issues. Leaders of international bodies such as the UN, OECD, UNESCO, and

WHO and of major business public sector charitable and professional organizations have all declared that systems thinking is an essential leadership skill for managing the complexity of the economic social and environmental issues that confront decision makers Systems thinking must be implemented more generally and on a wider scale to address these issues An evaluation of different systems methodologies suggests that they concentrate on different aspects of complexity To be in the best position to deal with complexity decision makers must understand the strengths and weaknesses of the various approaches and learn how to employ them in combination This is called critical systems thinking Making use of over 25 case studies the book offers an account of the development of systems thinking and of major efforts to apply the approach in real world interventions Further it encourages the widespread use of critical systems practice as a means of ensuring responsible leadership in a complex world The INCOSE Pioneer Award is presented to someone who by their achievements in the engineering of systems has contributed uniquely to major products or outcomes enhancing society or meeting its needs The criteria may apply to a single outstanding outcome or a lifetime of significant achievements in effecting successful systems Comments on a previous version of the book Russ Ackoff the book is the best overview of the field I have seen JP van Gigch Jackson does a masterful job The book is lucid well written and eminently readable Professional Manager Journal of the Chartered Management Institute Provides an excellent guide and introduction to systems thinking for students of management

Comparative Policing Issues R. I. Mawby, 2023-03-31 Originally published in 1990 Comparative Policing Issues was the first introductory text to consider key issues in the policing of modern societies from an international comparative perspective The author begins with a discussion of policing itself and considers how the modern police force has emerged Separate sections then focus on France and the Netherlands as examples of Western European societies Canada and Hong Kong as influenced by the colonial tradition Japan as an Eastern capitalist society and the USSR China and Cuba as contrasting examples of communist police systems These and other countries are then considered in terms of the relationship between the police and the communities they serve Critical issues addressed include the following Are communist and capitalist systems of policing significantly different What lessons are to be learnt from Japan with its low crime rate How accountable are the police in different societies and to whom To what extent is the character of the police in any society determined by the wider culture and social and political structure of that society How practicable is it to transfer ideas about policing from one society to another The lowering of barriers within the European community and the return of Hong Kong to China are just two examples of the need for a comparative analysis of policing Students of criminology and police studies and police and others working in the

Reintegrative Justice in Practice Helen Miles,Peter Raynor,2016-04-08 Recent years have seen the development of a growing international literature on restorative justice community justice and reintegrative alternatives to formal criminal justice processes This literature is stronger on theory and advocacy than on detailed evaluative studies It often relies for its practical examples on the presumed historical practices of the indigenous peoples of colonised territories or on attempts to revive or promote modified versions of these in a modern context which has led to debates about how far modern communities can provide a viable setting for such initiatives This book provides a unique study of the practice of traditional reintegrative community justice in a European society the Parish Hall Enquiry PHE in the Channel Island of Jersey This is an ancient institution based on an informal hearing and discussion of a reported offence with the alleged offender and other interested parties carried out by centeniers honorary police officers elected to one of Jersey s twelve parishes It is still in regular use as an integral part of a modern criminal justice system and it usually aims to resolve offences without recourse to formal prosecution in court Helen Miles and Peter Raynor s research arising from direct observation contributes to the literature on what works in resolving conflicts and influencing offenders and their detailed case studies of how problems are addressed gives a hands on flavour of the process The authors also document the aspects of community life in Jersey that facilitate or hinder the continuation of the PHEs drawing out the implications of these findings for wider debates about the necessary and sufficient social conditions for reintegrative justice to succeed
