Public Sector Reform Rationale Trends And Problems:

Public Sector Reform Jan-Erik Lane,1997 Leading experts from a number of countries examine the similarities and differences common problems and the future form of the public sector They argue that public sector reform deals with matters of justice and not just efficiency

Reforming the Malawian Public Sector Richard Tambulasi,2010-06-01 Reforming the Malawian Public Sector argues that the new public management model that Malawi like most African countries adopted under the influence of donor organisations has not led to the intended development The book examines decentralisation performance contracting and publicprivate partnerships as key aspects of the reforms and comes to the conclusion that at best it can be argued that the failures have been due to poor implementation and this could be attributed to the fact that the process was led by donors who lacked the necessary institutional infrastructure The book uses the 2005 6 fertiliser subsidy programme which the government embarked on despite donor resistance that it went against market models but which turned out to be overwhelmingly successful to demonstrate the states developmental ability and potential This volume is essential reading for academics students and practitioners seeking a deeper understanding of public administration management policy development and governance in Africa and the rest of the developing world The book is dedicated to the memory Guy Mhone a Malawian who was among Africas leading scholars in public administration and governance His works focused mainly on public sector reforms and development

Rethinking Development Challenges for Public Policy K. Hanson,G. Kararach,T. Shaw,2012-04-05 Covers topical issues for Africa s development economics and politics of climate change water management public service delivery and delivering aid The authors argue that these issues should be included in the post MDG paradigm and add an important voice to recent moves by academics and practitioners to engage with each other

Is Southeastern Europe Doomed to Instability? Dimitri A. Sotiropoulos,Thanos Veremis,2013-10-11 Considering the enormous problems of the Balkans during the 1990s the experts who contributed to this study believe that there are solutions to the seemingly intractable situation and the legacy of the disintegration of the former Soviet Union

The European Commission and the Integration of Europe Liesbet Hooghe,2001 What kind of European Union do top Commission officials want Should the European Union be supranational or intergovernmental Should it promote market liberalism or regulated capitalism Should the Commission be Europe s government or its civil service This 2002 book examines top officials preferences on these questions through analysis of unique data from 137 interviews Understanding the forces that shape human preferences is the subject of intense debate Hooghe demonstrates that the Commission has difficulty shaping its employees preferences in the fluid multi institutional context of the European Union Top officials preferences are better explained by experiences outside rather than inside the Commission political party country and prior work leave deeper imprints than directorate general or cabinet Preferences are also influenced more by internalized values than by self interested career calculation Hooghe s findings are surprising and will challenge a number of

common assumptions about the workings and motives of the European Commission

Joined-Up Government Vernon Bogdanor, 2005-07-21

These essays analyse joined up government consider its history and evaluate the consequences for British institutions such as the Cabinet the civil service and local authorities

Joined up government is a key theme of modern government

The Labour government first elected in 1997 decided that intractable problems such as social exclusion drug addiction and crime could not be resolved by a single department of government

Instead such problems had to be made the object of a concerted attack using all the arms of government central and local government and public agencies as well as the private and voluntary sectors

This volume brings together contributions from distinguished academics and also those who have themselves been engaged as practitioners in developing joined up programmes

It will be indispensable to all those who seek to understand how new developments in government are affecting our lives

Reform and Leadership in the Public Sector Joe L. Wallis, Brian Dollery, Linda McLoughlin, 2007

The authors provide a fresh and accessible multi disciplinary perspective on public management reform in this study

The work includes a broad survey of the paradigms and patterns that have shaped and differentiated the reform process in different countries

The book focuses on two themes not usually considered together

First the scope and limits of the role economists have played in reform processes not simply in terms of providing analytical models but in the actual leadership required to advance reform coherently

Secondly the authors examine the importance of developing leadership at all levels of the public sector to take advantage of the opportunities reforms have generated and to create new sources of public value

In bringing these themes together they uniquely show how the family of economic theories public choice agency theory and new institutional economics can be adapted to explain why there might be a demand for developing public sector leadership that reflects an appreciative managerial style as opposed to the hard edged contractualism often associated with public management reform

Leadership and Social Transformation in the Public Sector, 2003

This publication stems from a workshop of an expert group on New challenges for senior leadership enhancement for improved public management in a globalizing world held in Turin Italy on 19 September 2002

All the papers regardless of where they were first presented grapple with the issues of dominant concern in Turin the essence and role of leadership the competencies that leaders need to acquire to succeed and the methodologies to apply in recruiting and enhancing the impact of public service leaders
