unknown as a science of retailing In fact it is only by developing buying methods along scientific lines and by working out methods in the other divisions of retailing in the same way that we can hope to put storekeeping on a rational basis The department store and the chain store have been doing pioneer work along this line and to them and to a small band of scattered retailers of other types must be given much of the credit For it is generally known that a large part of their success is due to their development of scientific buying principles and practices But the difficulty has been to adapt the methods of the larger stores and particularly those in which it seems possible to install complete systems to the needs of the average retailer A system is of no value if it cannot be used About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
