long suffering with corrupted beauty which would ultimately end with his untimely death and the suicide of his grief stricken wife and their unborn child Modigliani contracted tuberculosis at an early age and was constantly stricken by his deteriorated health which may be one reason why he so willingly engaged in self destructive behavior Living in Paris he had affairs with women drank heavily smoked hashish and drank absinthe In a drunken stupor he would often strip naked at social gatherings He was against all of the excesses of a Bourgeois lifestyle and thus stripped them from his life even destroying paintings that he had made in his earlier years Although he purposely created a life in which chaos poverty and trouble lurked in every corner he was a prolific artist He sketched furiously sometimes drawing over 100 sketches in a day but many of his works were lost given away or in some cases destroyed by Modigliani himself His favorite subject was by far the human form painting the likenesses of other artists such as Pablo Picasso Diego Rivera Max Jacob and Juan Gris who all sat for the artist His formal works are characterized an elongation of the human form and mask like faces and his work is so unlike any other of his time that it still defies classification During his time other artists emulated him by engaging in a self destructive lifestyle and today his legacy lives on in nine novels and dozen films
