

# Program logic – Name of program or activity

**Problem statement/Proposal:** What is the need for the program or activity?

**Program objective:** What is the program or activity aiming to achieve?

Inputs	Activities	Outputs	Short-term outcomes	Medium-term outcomes	Long-term outcomes
What we invest (i.e. people, time, infrastructure)	What we do (to implement the program or activity)	What the program team and/or participant does (quantity how many actions, or activities, plan to be delivered and at stakeholders).  What are the targets?  How will this deliver short-term outcomes?	The difference we make in the short term  How will this deliver medium-term outcomes?	The difference we make in the medium term  How will this deliver long-term outcomes?	The difference we make in the long term

**Assumptions** (assumptions made as part of the theory of change – e.g. beliefs about how or why the program will work, who the stakeholders and participants are)

**External Factors** (areas of influence external to the entity/company that affect outcomes - these can include economic, geographic, cultural, competition and technology factors)
