Much of your success will depend on your business model and important value drivers such as contractually recurring revenue and network effects. The most important factor is the process you employ when you sell your company. The greater your company's reliance on the leverage of technology, the greater the room for the market to interpret its selling price. We explore all aspects of the M optimal transaction structures, avoiding punishing net working capital adjustments, negotiating tactics, and much more. This book is a must read for the tech entrepreneur contemplating the sale of their business. In order to maximize your company's value, you must fully engage the competitive marketplace. We have seen swings in the value of technology companies of millions of dollars between an unsolicited offer for a small software company by a Private Equity Group and the ultimate purchase transaction from a strategic industry player. That staggering result is the difference between selling at a cash flow multiple and selling for strategic value in a competitive soft auction. The greater the complexity of the process, the greater the advantage to the one with experience. Just ask a rookie quarterback in his first NFL start. Selling a business is a highly complex process, and the business seller is usually in their first transaction, while the typical buyer has made dozens of prior acquisitions. This book attempts to level the playing field by sharing the author's seventeen years of deal-making experience representing technology-focused sellers of businesses.
