Operations Analysis Using Microsoft Excel:

Operations Analysis Using Microsoft Excel Nancy C. Weida, Ronny Richardson, Andrew Vazsonyi, 2001 This book offers practical approaches to managerial decision making using spreadsheets The operations management problems reflect overall organizational issues and integrate other functional areas such as marketing and finance This book presupposes only a familiarity with Microsoft Excel to learn both basic and advanced techniques *Operations Methods* Kenneth A. Shaw, 2015-11-11 Updated to integrate the management of associated information processes expand some application discussions and provide additional reference material the intent of this monograph is to help business professionals use waiting line queuing analysis methods to improve both service and manufacturing business applications of queuing situations Emphasis is given to discussing the caveats in applying waiting line theory and becoming aware of the assumptions used in developing that theory The importance of accounting for variability in waiting line processes is discussed in some detail because the basic queuing equations provide only average performance data under steady state conditions Understanding how much variability can exist for a given waiting line scenario provides a manager with the insight required to reduce these effects and develop innovative solutions for improving service while reducing operating costs In general the mathematical tone of the book is focused on applications not the derivation of the formulas presented The few derivation exceptions illustrate some approaches not commonly discussed in textbooks for example the use of state diagrams and random number approximations of the probability distributions for use in simple simulation models To aid in understanding the material presented some practical examples are given at appropriate points in the text and some simulation approaches using common spreadsheet software are described **Handbook of Military and Defense Operations Research** Natalie M.
