Semantics. Volume 2 Klaus von Heusinger, Claudia Maienborn, Paul Portner, 2011-12-23 No detailed description available for SEMANTICS VON HEUSINGER ET AL BD 33 2 HSK E BOOK **Annual Workshop on Formal Approaches to Slavic Linguistics** Richard Compton, Magdalena Goledzinowska, Ulyana Savchenko, 2007 **Natural Language Processing and Information Systems** Andrés Montoyo, Rafael Munoz, Elisabeth Métais, 2005-05-03 NLDB 2005 the 10th International Conference on Applications of Natural Language to Information Systems was held on June 15 17 2005 at the University of Alicante Spain Since the first NLDB conference in 1995 the main goal has been to provide a forum to discuss and disseminate research on the integration of natural language resources in information system engineering The development and convergence of computing telecommunications and information systems has already led to a revolution in the way that we work communicate with each other buy goods and use services and even in the way that we entertain and educate ourselves The revolution continues and one of its results is that large volumes of information will increasingly be held in a form which is more natural for users than the data presentation formats typical of computer systems of the past Natural language processing NLP is crucial in solving these problems and language technologies will make an indispensable contribution to the success of information systems We hope that NLDB 2005 was a modest contribution to this goal NLDB 2005 contributed to advancing the goals and the high international standing of these conferences largely due to its Program Committee composed of renowned researchers in the field of natural language processing and information system engineering Papers were reviewed by three reviewers from the Program Committee This clearly contributed to the significant number of papers submitted 95 Twenty nine were accepted as regular papers while 18 were accepted as short papers Old Russian Possessive Constructions Hanne Martine Eckhoff, 2011-10-27 This book is a detailed study of the possessive semantic space within the framework of construction grammar Using corpus data from Old Church Slavonic and Old Russian the book uses semantic maps to document the relationship between form and meaning in a set of semantically closely related syntactic constructions

that can all express adnominal possession and all partially overlap The book also traces the development of these constructions from the earliest Slavic attestations towards Modern Russian thus also using the semantic maps as a diachronic tool This approach results in a much improved analysis of the data at hand The competing possessive constructions are treated as partly synonymous constructions in the same semantic space Changes are then seen to follow paths in this space The constructionist perspective also allows discerning the relative contributions of the possessor nominal the possessee nominal and properties of the constructions themselves The book is a contribution to Slavic historical linguistics to the general understanding of adnominal possession and to forwarding functionalist approaches to syntactic change

Beyond Coherence : the Syntax of Opacity in German Vera Lee-Schoenfeld,2005 Annual Workshop on Formal Approaches to Slavic Linguistics ,2008 The Nominal Structure in Slavic and Beyond Lilia Schürcks,Anastasia Giannakidou,Urtzi Etxeberria,2013-12-12 The contributions in this volume shed new light on the discussion of whether the DP hypothesis applies universally or not The issue is prominent not only for Slavic languages Drawing on evidence from many other languages Greek East Asian and Basque among them the book has important implications for answering fundamental questions about the nature of definiteness and quantification
